ABSTRACT

*Survey of Income and Program Participation (SIPP)
1986 Panel Wave 2 Rectangular Core and Topical Module
Microdata File [machine-readable data file] / conducted
by the U.S. Bureau of the Census. —Washington: The Bureau
[producer and distributor], 1989.*

Type of File:

Microdata; unit of observation is an individual.

Universe Description:

The universe is the resident population of the United States, but excluding persons living in institutions and military barracks.

Subject-Matter Description:

The file contains basic demographic and social characteristics data for each member of the household. These include age, sex, race (White; Black; American Indian, Eskimo, and Aleut; Asian or Pacific Islander; and Other), ethnic origin (23 categories including 7 Spanish origin categories), marital status, household relationship, education, and veteran status. Limited data are provided on housing unit characteristics such as units in structure, tenure, access, and complete kitchen facilities. Core questions, which are repeated at each interview, cover labor force activity, types and amounts of income, and participation in various cash and noncash benefit programs for each month of the four-month reference period. Data for employed persons include number of hours and weeks worked, earnings, and weeks without a job. Nonworkers are classified as unemployed or not in the labor force. In addition to income data associated with labor force activity, data include nearly 50 other types of income. Core data also cover post secondary school attendance, public or subsidized rental housing, low-income energy assistance, and school breakfast and lunch participation. Topical module data cover fertility, marital, migration, reciprocity, employment, work disability, and education and training histories as well as family background and household relationships.

The sample consists of 4 rotation groups, each interviewed in a different month from June to September 1986. For each group the reference period for reporting labor force activity and income is the four calendar months preceding the interview month.

SIPP is a longitudinal survey where each sampled household and each descendent household is reinterviewed at 4-month intervals for 7 interviews or "waves." This file contains the results of the second interview. Unique codes are included on each record to allow linking together the same persons from the preceding and subsequent waves.

Geographic Coverage:

United States. Codes are included for 41 individual States and the District of Columbia, **although the sample was not designed to produce State estimates.** Areas in the SIPP sample in nine other States are identified in three groups for confidentiality reasons. The file identifies a subsample of metropolitan residents, along with codes for selected metropolitan statistical areas (MSA's) and consolidated metropolitan statistical areas (CMSA's).

Technical Description:

File Structure: Rectangular. Each logical record for a sampled person includes information on the household and family of which the person was a part during each month of the reference period, as well as characteristics of the person and each source of income received during the period.

File Size: 31,643 logical records; 6,888 character logical record length.

File Sort Sequence of Sample Units: Sampling unit identification number by entry address ID and person number within sampling unit.

Reference Materials:

Survey of Income and Program Participation (SIPP) 1986 Panel, Wave 2 Rectangular Core and Topical Module Microdata File Technical Documentation. The documentation includes this abstract, the data dictionary, an index to the data dictionary, relevant code lists, a questionnaire facsimile, and general information relative to SIPP. One copy of the technical documentation accompanies each file order but also may be purchased separately for \$25 from Data User Services Division, Customer Services, Bureau of the Census, Washington, D.C. 20233.

Interviewers' Manual (1985). Survey of Income and Program Participation. U.S. Department of Commerce, Bureau of the Census. The Manual is available for \$10 from Data User Services Division, Customer Services, Bureau of the Census, Washington, D.C. 20233.

Survey of Income and Program Participation Users' Guide. The Users' Guide contains a general overview of the file as well as chapters on survey design and content, structure and use of cross-sectional files, linking waves and reliability of the data. A single copy accompanies each technical documentation or tape order. Additional copies are available for \$15 each from Customer Services, Data User Services Division, Bureau of the Census, Washington, D.C. 20233.

Related Printed Reports:

Related printed reports include working papers, compilations of papers presented at annual meetings of the American Statistical Association, articles appearing in the *Journal of Economic and Social Measurement*, and reports in the P-70 series of the Current Population Reports. See the Users' Guide that accompanies the documentation for ordering information.

Related Machine-Readable Data Files:

SIPP files from all Waves from the 1984 and 1985 Panels. Waves 1-5 and Wave 7 from the 1986 Panel, and Wave 1 from the 1987 Panel are available from Customer Services, Data User Services Division, Bureau of the Census, Washington, D.C. 20233. Order forms are on the following pages for your convenience.

File Availability:

The file is available on 2 reels at 6250 bpi and on 7 reels at 1600 bpi. The cost is \$175 per reel. It may be ordered from Customer Services using the order form on the following page. A machine-readable dictionary is contained at the end of reel 7 at 1600 bpi and reel 2 at 6250 bpi. It is also available separately for \$175 on 1 reel at either density.

FILE INFORMATION

Geographic Coverage

State codes are shown except for nine States which are identified in three groups. A subsample of metropolitan residents is identified along with codes for selected metropolitan statistical areas (MSA's) and consolidated metropolitan statistical areas (CMSA's). **The sample was not designed to produce State or MSA/CMSA level estimates.** State codes are primarily useful in relating a respondent's reciprocity of benefits to thresholds which may vary from State to State. MSA/CMSA codes may be used in relating respondent characteristics with contextual variables.

Identification Number System

The SIPP identification scheme is designed to uniquely identify individuals in each wave, provide a means of linking the same individuals over time, and group individuals into households and families over time.

The various components of the identification scheme are listed below:

- Sample Unit Identification Number
- Address ID
- Entry Address ID
- Person Number

The sample unit identification number was created by scrambling together the PSU, segment, and serial numbers used for Census Bureau administrative purposes. This identifier is constructed the same way on each wave regardless of moves, to enable matching from wave to wave.

The two-digit address ID code identifies each household associated with the same sample unit identification number. The first digit of the address ID code indicates the wave in which that address was first assigned for interview. The second digit sequentially numbers multiple households that have the same serial number. The address ID code is 11 for all sample addresses that are the same as in Wave 1. As SIPP sample persons move to new addresses, new address ID codes are assigned. Any new address to which sample unit members moved during Wave 4 is numbered in the 40's.

The person ID is a five-digit number consisting of the two-digit entry address ID and a three-digit person number. Person numbers 101, 102, etc., are assigned in Wave 1; 201, 202, etc., are assigned to persons added to the roster in Wave 2, and so forth. This five-digit number is not changed or updated, regardless of moves.

The sampling unit serial number and address ID code uniquely identifies each household in any given wave. The sampling unit serial number can link all households in subsequent waves back to the original Wave 1 household.

Topcoding of Income Variables

To protect against the possibility that a user might recognize the identity of a SIPP respondent with very high income, income from every source is "topcoded" so that no individual income amounts above \$100,000 are revealed. While the data dictionary indicates a topcode of \$33,332 for monthly income, this topcode will rarely be used. In most cases the monthly income is shown as an individual dollar amount of \$8,333, with \$8,333 actually representing "\$8,333 or more." (the \$100,000 annual income topcode is \$8,333 multiplied by 12 months). Individual monthly amounts above \$8333 may occasionally be shown if the respondent's income varied considerably from month to month, as long as the average does not exceed \$8,333. For example, if a respondents' income from a single job were concentrated in only one of the four reference months, a figure as high as \$33,332 could be shown. (Income from interest or property have lower topcodes).

Summary income figures on the person, family, and household records are simple sums of the components shown on the file after topcoding, and are not independently topcoded. Thus, a person with high income from

several sources (jobs, businesses, property) could have aggregate monthly income well over the topcode for each source. Families and households with a number of high income members could theoretically have aggregate income shown well over \$100,000, through well below the \$1.5 million shown as the highest allowable value in the data dictionary.

The user is cautioned against trying to make much use of the occasional monthly figures above \$8,333, except in calculating aggregates or observing patterns across the 4-month period for a single individual, family, or household. Those units with higher monthly amounts shown are a biased sample of high income units, more likely to include units with income from multiple sources than other units with equally high aggregate income which comes from a single source.

GLOSSARY OF SELECTED TERMS

Population coverage. The estimates are restricted to the civilian noninstitutional population of the 50 States and members of the Armed Forces living off post or with their families on post.

Farm-nonfarm residence. The farm population refers to rural residents living on farms. Under this definition, a farm is any place in rural territory from which sales of crops, livestock, and other agricultural products amounted to \$1,000 or more during the previous 12-month period.

Householder. Survey procedures call for listing first the person (or one of the persons) in whose name the home is owned or rented. If the house is owned jointly by a married couple, either the husband or the wife may be listed first, thereby becoming the reference person, or householder, to whom the relationship of the other household members is recorded. One person in each household is designated as the 'householder.' The number of householders, therefore, is equal to the number of households.

Household. A household consists of all persons who occupy a housing unit. A house, an apartment or other group of rooms, or a single room is regarded as a housing unit when it is occupied or intended for occupancy as separate living quarters; that is, when the occupants do not live and eat with any other persons in the structure and there is either (1) direct access from the outside or through a common hall or (2) a kitchen or cooking equipment for the exclusive use of the occupants.

A household includes the related family members and all the unrelated persons, if any, such as lodgers, foster children, wards, or employees who share the housing unit. A person living alone in a housing unit or a group of unrelated persons sharing a housing unit as partners is also counted as a household. The count of households excludes group quarters. Examples of group quarters include rooming and boarding houses, college dormitories, and convents and monasteries.

Family. A family is a group of two or more persons (one of whom is the householder) related by birth, marriage, or adoption and residing together; all such persons (including related subfamily members) are considered members of one family.

Family household. A family household is a household maintained by a family; any unrelated persons (unrelated subfamily members and/or secondary individuals) who may be residing there are included. The number of family households is equal to the number of families. The count of family household members differs from the count of family members, however, in that the family household members include all persons living in the household, whereas family members include only the householder and his/her relatives.

Nonfamily household. A nonfamily household is a household maintained by a person living alone or with nonrelatives only.

Race. The population is divided into groups on the basis of race: White; Black; American Indian, Eskimo, or Aleut; Asian or Pacific Islander; and 'other races.'

Persons of Spanish origin. Persons of Spanish origin were determined on the basis of a question that asked for self-identification of the person's origin or descent. Respondents were asked to select their origin (or the origin of some other household member) from a 'flash card' listing ethnic origins. Persons of Spanish origin, in particular, were those who indicated that their origin was Mexican, Puerto Rican, Cuban, Central or South American, or some other Spanish origin. It should be noted that persons of Spanish origin may be of any race.

Work disability. Persons were classified as having a work disability if they were identified by the respondent as having a physical, mental, or other health condition that limits the kind or amount of work they can do.

Monthly income. The monthly income estimates for households are based on the sum of the monthly income received by each household member age 15 years old or over.

Cash income includes all income received from any of the sources listed in Appendix B-1. Rebates, refunds, loans, and capital gain or loss amounts from the sale of assets, and interhousehold transfers of cash such as allowances are not included. Accrued interest on Individual Retirement Accounts, KEOUGH retirement plans, and U.S. Savings bonds are also excluded. This definition differs somewhat from that used in the annual income reports based on the March CPS Income supplement questionnaire. These data, published in the Consumer Income Series, P-60, are based only on income received in a regular or periodic manner and, therefore, exclude lump-sum or one-time payments such as inheritances and insurance settlements. The March CPS income definition, however, does exclude the same income sources excluded by SIPP.

The income amounts represent amounts actually received during the month, before deductions for income and payroll taxes, union dues, Part B Medicare premiums, etc.

The SIPP income definition includes three types of earnings: wages and salary, nonfarm self-employment, and farm self-employment. The definition of nonfarm self-employment and farm self-employment is not based on the net difference between gross receipts or sales and operating expenses, depreciation, etc. The monthly amounts for these income types are based on the salary or other income received from the business by the owner of the business or farm during the 4-month reference period.

The Bureau of Labor Statistics publishes quarterly averages for an earnings concept called 'usual weekly earnings' for employed wage and salary workers. The concept differs from the SIPP earnings concept since it is based on usual, not actual earnings, excludes the self-employed, and excludes earnings from secondary jobs.

While the income amounts from most sources are recorded monthly for the 4-month reference period, property income amounts, interest, dividends, rental income, etc., were recorded as totals for the 4-month period. These totals were distributed equally between months of the reference period for purposes of calculating monthly averages.

Means-tested benefits. The term means-tested benefits refers to programs that require the income or assets (resources) of the individual or family be below specified guidelines in order to qualify for benefits. These programs provide cash and noncash assistance to the low-income population. The major sources of means-tested cash and noncash assistance are shown in Appendix B-2.

Medicare. This term refers to the Federal Health Insurance Program for the Aged and Disabled as provided for by Title XVIII of the Social Security Act. The phrase 'Medicare covered' refers to persons enrolled in the Medicare program, regardless of whether they actually utilized any Medicare covered health care services during the survey reference period.

Medicaid. This term refers to the Federal-State program of medical assistance for low-income individuals and their families as provided for by Title XIX of the Social Security Act. The phrase 'Medicaid covered' refers to persons enrolled in the Medicaid program, regardless of whether they actually utilized any Medicaid covered health care services during the survey reference period.

Unemployment compensation. This term refers to cash benefits paid to unemployed workers through a State or local unemployment agency. These include all benefits paid under the Federal-State unemployment insurance program as established under the Social Security Act, as well as those benefits paid to State and local government employees, Federal civilian employees, and veterans.

Low-Income Home Energy Assistance Program. Benefits from the Federally funded LIHEAP authorized by Title XXVI of the Omnibus Budget Reconciliation Act of 1981, or comparable assistance provided through State funded assistance programs, may be received in the form of direct payment to the household as reimbursement for heating or cooling expenses or paid directly to the fuel dealer or landlord.

Special Supplemental Food Program for women, Infants, and Children (WIC). Benefits are received in the form of vouchers that are redeemed at retail stores for specific supplemental nutritious foods. Eligible low-income recipients are infants and children up to age five and pregnant, postpartum, and breastfeeding women.

With a Job. Persons are classified 'with a job' in a given month if they were 16 years old or over and, during the month, either (a) worked as paid employees or worked in their own business or profession or on their own farm or worked without pay in a family business or farm or (b) were temporarily absent from work either with or without pay. In general, the word 'job' implies an arrangement for regular work for pay where payment is in cash wages or salaries, at piece rates, in tips, by commission, or in kind (meals, living quarters, supplies received). 'Job' also includes self-employment at a business, professional practice, or farm. A business is defined as an activity which involves the use of machinery or equipment in which money has been invested or an activity requiring an office or 'place of business' or an activity which requires advertising; payment may be in the form of profits or fees.

The Current Population Survey (CPS), the official source of labor force statistics for the Nation, uses the same definition for a job or business. The term 'with a job,' however, should not be confused with the term 'employed' as used in the CPS. 'With a job' includes those who were temporarily absent from a job because of layoff and those waiting to begin a new job in 30 days; in the CPS these persons are not considered 'employed.' See 'Worked each week' below.

Worked each week. Persons 'worked each week' in a month if, for the entire month, they were 'with a job' and not 'absent without pay' from the job. In other words, a person worked each week in any month when they were (a) on the job the entire month, or (b) they received wages or a salary for all weeks in the month, whether they were on the job or not. Persons also worked each week if they were self-employed and spent time during each week of the month at or on behalf of the business or farm they owned, as long as they received or expected to receive profit or fees for their work.

In the CPS, the concept 'at work' includes those persons who spent at least 1 hour during the reference week at their job or business. In the CPS, however, 'at work' does not include persons who were temporarily absent from their jobs during the entire reference week on paid vacation, sick leave, etc. In SIPP, 'worked each week' does include persons on paid absences.

Absent 1 or more weeks. Absent 1 or more weeks means absent without pay from a job or business. Persons were absent without pay in a month if they were 'with a job' during the entire month, but were not at work at that job during at least 1 full week (Sunday through Saturday) during the month, and did not receive wages or a salary for any time during that week. Reasons for an unpaid absence include vacation, illness, layoff, bad weather, labor disputes, and waiting to start a new job.

Looking for work. Persons who 'looked for work' in a given month are those who were 16 years old or over and (a) were without a job during at least 1 week during the month, (b) tried to get work or establish a business or profession in that week, and (c) were available to accept a job. Examples of jobseeking activities are (1) registering at a public or private employment office, (2) meeting with prospective employers, (3) investigating possibilities for starting a professional practice or opening a business, (4) placing or answering advertisements, (5) writing letters of application, and (6) being on a professional register.

The CPS uses a similar concept of 'looking for work.' The term 'unemployed' as used in the CPS includes persons who were looking for work in the reference week and those who were 'on layoff' or 'waiting to begin a new job in 30 days.'

Layoff. In general, the word 'layoff' means release from a job because of slack work, material shortages, inventory taking, plant remodeling, installation of machinery, or other similar reasons. For this survey, persons were also on 'layoff' who did not have job but who responded that they has spent at least 1 week on layoff from a job and that they were available to accept a job.

In addition, persons were on 'layoff' in a given month if they were 16 years old or over and (a) were 'with a job' but 'absent without pay' from that job for at least 1 full week during that month, and (b) they responded that their main reason for being absent from their job or business was 'layoff.' 'On layoff' also includes a small number of persons who responded that they were waiting to report to a new wage and salary job that was to begin within 30 days. In other words, persons waiting to begin a new job are classified together with persons waiting to return to a job from which they have been laid off.

Full-time and part-time. The data on full- and part-time workers pertain to the number of hours a person usually worked per week during the weeks worked in the 4-month reference period of the survey. If the hours worked per week varied considerably, the respondent was asked to report an approximate average of the actual hours worked each week.

Persons 16 years old and over who reported usually working 35 or more hours each week during the weeks they worked are classified as 'full-time' workers; persons who reported that they usually worked fewer than 35 hours are classified as 'part-time' workers. The same definitions are used in the CPS.

With labor force activity. The term 'with labor force activity' includes all persons with a job (as defined above) and those looking for work or on layoff from a job for at least 1 week during a given month. Conversely, those persons 'with no labor force activity' had no job, were not on layoff from a job and made no effort to find a job during the month.

INDEX TO SIPP RECTANGULAR CORE FILE

This is an index to the data dictionary for the 1986 panel SIPP rectangular core files, Waves 2 to 7. Wave 1 has a slightly different layout, with corresponding items in the same sequence but not exactly the same locations.

The column heading "ITEM" lists the items in alphabetic order. The column headed "MNEMONIC" presents the same 8-character data names as are shown in the data dictionary, with two exceptions. Where there are separate entries for the four reference months, an asterisk (*) replaces the 1, 2, 3, or 4 that would appear in the actual mnemonic. Where there is an entry in the "LOC" column as well as the four months, the data item refers to the same characteristic as of the interview date, and would carry a 5 in place of the asterisk in the mnemonic. Where a colon appears in the mnemonic, as in SC1660:78, the index entry applies to two or more consecutive fields, in this case starting with SC1660 and ending with SC1678.

The five columns at the right present the beginning character location for the referenced data field or fields. Entries in the four righthand columns refer to data specific to particular months during the reference period. For example, data in the column headed "MON1" refer to the first reference months (four months prior to the interview). Entries in the column headed "LOC" refer to characteristics as of the interview date, e.g., the highest grade attended, or other items not differentiated by month during the reference period. Where the entry refers to more than one consecutive data field, the location is that of the first character of the first field.

This index may also be used as an index to the questionnaire document itself, reproduced in Appendix B. Each item on the questionnaire carries a boxed 4-digit number next to the answer fields. This number appears as part of the mnemonic wherever the correspondence between the item on tape and the questionnaire item is direct. The 4-digit number is usually preceded by "SC", but when other characters appear they add meaning. For example, WS1-2012 corresponds to questionnaire item 2012 (on class of worker) and the "WS1" distinguishes the response for the first wage/salary job from a response for the second such job, which would begin with "WS2". Mnemonics without 4-digit numbers are associated with items from the control card or are the result of manipulating or "recoding" one or more items from the questionnaire.

HOW TO USE THE DATA DICTIONARY

The Data Dictionary describes the contents and record layout of the public-use computer tape file. The first line of each data item description gives the data name, size of the data field, relative begin position of the field, and the begin position of the field.

The next few lines contain descriptive text and any applicable notes. Categorical value codes and labels are given where needed. Comment notes marked by an (*) are provided throughout. Comments should be removed from the machine-readable version of the data dictionary before using it to help access the data file.

Data. Alphabetic, numeric, and the special character (-). No other special characters are used. It may be a mnemonic such as "HH-STATE" or "SE-OCC", or a sequential identifier such as "SC3138" or "WS-IMP01". Data item names are unique throughout the entire file (all 8 record types).

Size. Numeric. The size of a data item is given in characters. Indication of implied decimal places is provided in notes.

Relative Begin. Numeric. Identical to the begin position.

Begin. Numeric. Contains the location in the data record of the first character position of the data item field.

The first line of each data item description begins with the character "D" (left-justified, two characters). The "D" flag indicates lines in the data dictionary containing the name, size, relative begin and begin position of each data item. This information (in machine-readable form) can be used to help access the data file. The line beginning with the character "U" describes the universe for that item. Lines containing categorical value codes and labels follow next and begin with the character "V". The special character (.) denotes the start of the value labels. Two examples of data item descriptions follow:

```
D SC2030      1   74   74
  During the 4-month period how often
  was...paid on the job?
U Persons 15 years old and older
V 0 .Not in universe
V 1 .Once a week
V 2 .Once each 2 weeks
V 3 .Once a month
V 4 .Twice a month
V 5 .Some other way

D FF-PINX     60   24   24
  Indexes of person records of family
  members.
  Note: This item consists of thirty (30)
  2-character cells. Each cell
  contains an index number (1-30).
U All families
```

D H2-SAMPL 2 0368
Sample code - indicates panel year
U All households

D H2-SEG 1 0370
Segment type - item 4 on the control
card
U All households
V 1 .Address
V 2 .Unit
V 3 .Permit
V 4 .Area
V 5 .Special place

D H2-INTCD 3 0371 CHAR
Interviewer code, an alphabetic
followed by two numerics
U All households

D U2CCWAVE 1 0374
Wave for which the control card was
first prepared (should be the wave in
which household came into existence)
U All households

D U2FRMSLE 1 0375
Control card item 12B - during the
past 12 months did sales of crops,
livestock, and other farm products
from the place amount to \$1000 or
more
U All households
V 0 .Not answered
V 1 .Yes
V 2 .No
V 3 .Not applicable

D U2-ACCES 1 0376
Control card item 13B - access to
the unit
U All households

** Change variables **		

D HCHANGE1	1	2220
Used to determine if the household in		
which this person lived changed		
composition over the 4 reference months		
or in the 5th month up until date of		
interview. A change in address is not		
reflected in this field unless the		
composition of the group living		
together changes as a result. The		
first field is always "1". For each		
succeeding month the value of the field		
is the same as for the preceding month		
if there has been no change in		
composition. If a change has occurred,		
the field for the following month is		
one greater than the field for the		
preceding month. Month 1. Range = 1		
U All persons, including children		
D HCHANGE2	1	2221
Used to determine if the household in		
which this person lived changed		
composition. Month 2. Range = 1:2		
U All persons, including children		
D HCHANGE3	1	2222
Used to determine if the household in		
which this person lived changed		
composition. Month 3. Range = 1:3		
U All persons, including children		
D HCHANGE4	1	2223
Used to determine if the household in		
which this person lived changed		
composition. Month 4. Range = 1:4		

DATA SIZE BEGIN

U All persons, including children

D HCHANGE5 1 2224

Used to determine if the household in which this person lived changed composition. Interview date.

Range = 1:5

U All persons, including children

D FCHANGE1 1 2225

Used to determine if the family (or pseudo family) changed in composition from one month to the next.

These fields only relate to primary and unrelated secondary families and to primary and secondary individuals. To determine change in related subfamilies see 'S-CHANGE' below. The values of the fields for the respective months are determined in the same manner as for 'H-CHANGE' above. Month 1. Range = 1

U All persons, including children

D FCHANGE2 1 2226

Used to determine if the family (or pseudo family) changed in composition. Month 2. Range = 1:2

U All persons, including children

D FCHANGE3 1 2227

Used to determine if the family (or pseudo family) changed in composition. Month 3. Range = 1:3

U All persons, including children

D FCHANGE4 1 2228

Used to determine if the family (or pseudo family) changed in composition. Month 4. Range = 1:4

U All persons, including children

D SCHANGE1 1 2229

Used to determine if the related subfamily which includes this person, changed composition from month to month. If, during any month, the person is not a member of a related subfamily, the value of the field for the corresponding month is '0'. For members of subfamilies the values in the fields are derived as in 'H-CHANGE' above. Month 1. Range = 1

U All persons, including children

D SCHANGE2 1 2230

Used to determine if the related subfamily which includes this person, changed composition. Month 2. Range = 1:2

U All persons, including children

D SCHANGE3 1 2231

Used to determine if the related subfamily which includes this person, changed composition. Month 3. Range = 1:3

U All persons, including children

D SCHANGE4 1 2232

Used to determine if the related subfamily which includes this person, changed composition. Month 4.

SOURCE AND ACCURACY STATEMENT SURVEY OF INCOME AND PROGRAM PARTICIPATION (SIPP) 1986 AND 1987 PANELS

SOURCE OF DATA

The data were collected in the 1986 and 1987 panels of the Survey of Income and Program Participation (SIPP). The SIPP universe is the noninstitutionalized resident population living in the United States. The population includes persons living in group quarters, such as dormitories, rooming houses, and religious group dwellings. Crew members of merchant vessels, Armed Forces personnel living in military barracks, and institutionalized persons, such as correctional facility inmates and nursing home residents, were not eligible to be in the survey. Also, United States citizens residing abroad were not eligible to be in the survey. Foreign visitors who work or attend school in this country and their families were eligible; all others were not eligible to be in the survey. With the exception noted above, persons who were at least 15 years of age at the time of the interview were eligible to be in the survey.

Each of the 1986 and 1987 panels of the SIPP sample are located in 230 Primary Sampling Units (PSUs) each consisting of a county or a group of contiguous counties. Within these PSUs, expected clusters of 2 living quarters (LQs) were systematically selected from lists of addresses prepared for the 1980 decennial census to form the bulk of the sample. To account for LQs built within each of the sample areas after the 1980 census, a sample was drawn of permits issued for construction of residential LQs up until shortly before the beginning of the panel. In jurisdictions that do not issue building permits, small land areas were sampled and the LQs within were listed by field personnel and then clusters of 4 LQs were subsampled. In addition, sample LQs were selected from supplemental frames that included LQs identified as missed in the 1980 census and persons residing in group quarters at the time of the Census.

Approximately 16,300 living quarters were originally designated for the 1986 panel and approximately 16,700 for the 1987 panel. For Wave 1 of the 1986 panel, interviews were obtained from the occupants of about 11,500 of the 16,300 designated living quarters. For Wave 1 of the 1987 Panel about 11,700 interviews were obtained from the 16,700 designated living quarters. Most of the remaining 4800 living quarters in the 1986 panel and 5000 living quarters in the 1987 panel were found to be vacant, demolished, converted to nonresidential use, or otherwise ineligible for the survey. However, approximately 900 of the 4800 living quarters in the 1986 panel and 800 of the 5000 living quarters in the 1987 panel were not interviewed because the occupants refused to be interviewed, could not be found at home, were temporarily absent, or were otherwise unavailable. Thus, occupants of about 93 percent of all eligible living quarters participated in Wave 1 of the Survey for both the 1986 and 1987 panels.

For Waves 2-7, only original sample persons (those in Wave 1 sample households and interviewed in Wave 1) and persons living with them were eligible to be interviewed. With certain restrictions, original sample persons were to be followed if they moved to a new address. When original sample persons moved without leaving a forwarding address or moved to extremely remote parts of the country and no telephone number was available, additional noninterviews resulted.

Sample households within a given panel are divided into four subsamples of nearly equal size. These subsamples are called rotation groups 1, 2, 3, or 4 and one rotation group is interviewed each month. Each household in the sample was scheduled to be interviewed at 4 month intervals over a period of roughly 2½ years beginning in February 1986 for the 1986 panel and February 1987 for the 1987 panel. The reference period for the questions is the 4-month period preceding the interview month. In general, one cycle of four interviews covering the entire sample, using the same questionnaire, is called a wave. The exception is Wave 3 for the 1986 panel which covers three interviews.

The public use files include core and supplemental (topical module) data. Core questions are repeated at each interview over the life of the panel. Topical modules include questions which are asked only in certain waves. The 1986 and 1987 panel topical modules are given in tables 1 and 2, respectively.

Tables 3 and 4 indicate the reference months and interview months for the collection of data from each rotation group for the 1986 and 1987 panels. For example, Wave 1 rotation group 2 of the 1986 panel was interviewed in February 1986 and data for the reference months October 1985 through January 1986 were collected.

Table 1 1986 Panel Topical Modules

SOURCE AND ACCURACY

Estimation.

The estimation procedure used to derive SIPP person weights involved several stages of weight adjustments. In the first wave, each person received a base weight equal to the inverse of his/her probability of selection. For each subsequent interview, each person received a base weight that accounted for following movers. A noninterview adjustment factor was applied to the weight of every occupant of interviewed households to account for households which were eligible for the sample but were not interviewed. (Individual nonresponse within partially interviewed households was treated with imputation. No special adjustment was made for noninterviews in group quarters.) A factor was applied to each interviewed person's weight to account for the SIPP sample areas not having the same population distribution as the strata from which they were selected.

An additional stage of adjustment to persons' weights was performed to reduce the mean square error of the survey estimates by ratio adjusting SIPP sample estimates to monthly Current Population Survey (CPS) estimates¹ of the civilian (and some military) noninstitutional population of the United States by age, race, Spanish origin, sex, type of householder (married, single with relatives, single without relatives), and relationship to householder (spouse or other). The CPS estimates were themselves brought into agreement with estimates from the 1980 decennial census which were adjusted to reflect births, deaths, immigration, emigration, and changes in the Armed Forces since 1980. Also, an adjustment was made so that a husband and wife within the same household were assigned equal weights.

Use of Weights.

Each household and each person within each household on each wave tape has five weights. Four of these weights are reference month specific and therefore can be used only to form reference month estimates. Reference month estimates can be averaged to form estimates of monthly averages over some period of time. For example, using the proper weights, one can estimate the monthly average number of households in a specified income range over November and December 1986. To estimate monthly averages of a given measure (e.g., total, mean) over a number of consecutive months, sum the monthly estimates and divide by the number of months.

The remaining weight is interview month specific. This weight can be used to form estimates that specifically refer to the interview month (e.g., total persons currently looking for work), as well as estimates referring to the time period including the interview month and all previous months (e.g., total persons who have ever served in the military).

To form an estimate for a particular month, use the reference month weight for the month of interest, summing over all persons or households with the characteristic of interest whose reference period includes the month of interest. Multiply the sum by a factor to account for the number of rotations contributing data for the month. This factor equals four divided by the number of rotations contributing data for the month. For example, February 1986 data is only available from rotations 1, 3, and 4 for Wave 1 of the 1986 panel, so a factor of 4/3 must be applied. To form an estimate for an interview month, use the procedure discussed above using the interview month weight provided on the file.

When estimates for months without four rotations worth of data are constructed from a wave file, factors greater than 1 must be applied. However, when core data from consecutive waves are used together, data from all four rotations may be available, in which case the factors are equal to 1.

These tapes contain no weight for characteristics that involve a person's or household's status over two or more months (e.g., number of households with a 50 percent increase in income between November and December 1986).

1. These special CPS estimates are slightly different from the published monthly CPS estimates. The differences arise from forcing counts of husbands to agree with counts of wives.

Producing Estimates for Census Regions and States.

The total estimate for a region is the sum of the state estimates in that region.

Using this sample, estimates for individual states are subject to very high variance and are not recommended. The state codes on the file are primarily of use for linking respondent characteristics with appropriate contextual variables (e.g., state-specific welfare criteria) and for tabulating data by user-defined groupings of states.

Producing Estimates for the Metropolitan Population.

For Washington, DC and 11 states, metropolitan or non-metropolitan residence is identified (variable H*-METRO). In 34 additional states, where the non-metropolitan population in the sample was small enough to present a disclosure risk, a fraction of the metropolitan sample was recoded to be indistinguishable from non-metropolitan cases (H*-METRO=2). In these states, therefore, the cases coded as metropolitan (H*-METRO=1) represent only a subsample of that population.

In producing state estimates for a metropolitan characteristic, multiply the individual, family, or household weights by the metropolitan inflation factor for that state, presented in table 8. (This inflation factor compensates for the subsampling of the metropolitan population and is 1.0 for the states with complete identification of the metropolitan population.)

The same procedure applies when creating estimates for particular identified MSA's or CMSA's--apply the factor appropriate to the state. For multi-state MSA's, use the factor appropriate to each state part. For example, to tabulate data for the Washington, DC-MD-VA MSA, apply the Virginia factor of 1.0521 to weights for residents of the Virginia part of the MSA; Maryland and DC residents require no modification to the weights (i.e., their factors equal 1.0).

In producing regional or national estimates of the metropolitan population, it is also necessary to compensate for the fact that no metropolitan subsample is identified within two states (Mississippi and West Virginia) and one state-group (North Dakota - South Dakota - Iowa). Thus, factors in the right-hand column of table 8 should be used for regional and national estimates. The results of regional and national tabulations of the metropolitan population will be biased slightly. However, less than one-half of one percent of the metropolitan population is not represented.

Producing Estimates for the Non-Metropolitan Population.

State, regional, and national estimates of the non-metropolitan population cannot be computed directly, except for Washington, DC and the 11 states where the factor for state tabulations in table 8 is 1.0. In all other states, the cases identified as not in the metropolitan subsample (METRO=2) are a mixture of non-metropolitan and metropolitan households. Only an indirect method of estimation is available: first compute an estimate for the total population, then subtract the estimate for the metropolitan population. The results of these tabulations will be slightly biased.

ACCURACY OF THE ESTIMATES

SIPP estimates obtained from public use files are based on a sample; they may differ somewhat from the figures that would have been obtained if a complete census had been taken using the same questionnaire, instructions, and enumerators. There are two types of errors possible in an estimate based on a sample survey: nonsampling and sampling. The magnitude of SIPP sampling error can be estimated, but this is not true of nonsampling error. Found below are descriptions of sources of SIPP nonsampling error, followed by a discussion of sampling error, its estimation, and its use in data analysis.

Nonsampling Variability.

Nonsampling errors can be attributed to many sources, e.g., inability to obtain information about all cases in the sample, definitional difficulties, differences in the interpretation of questions, inability or unwillingness on the part of the respondents to provide correct information, inability to recall information, errors made in collection such as in recording or coding the data, errors made in processing the data, errors made in estimating values for missing data, biases resulting from the differing recall periods caused by the rotation pattern used and failure to represent all units within the universe (undercoverage). Quality control and edit procedures were used to reduce errors made by respondents, coders and interviewers.

Undercoverage in SIPP results from missed living quarters and missed persons within sample households. It is known that undercoverage varies with age, race, and sex. Generally, undercoverage is larger for males than for females and larger for blacks than for nonblacks. Ratio estimation to independent age-race-sex population controls partially corrects for the bias due to survey undercoverage. However, biases exist in the estimates to the extent that persons in missed households or missed persons in interviewed households have different characteristics than the interviewed persons in the same age-race-Spanish origin-sex group. Further, the independent population controls used have not been adjusted for undercoverage.

The following tables summarize information on household nonresponse for the interview months for Wave 1 of the 1986 and 1987 panels, respectively.

Table 5. 1986 Panel: Sample Size, by Month and Interview Status

Household Units Eligible				Nonresponse Rate (%)
Month	Total	Interviewed	Noninterviewed	
Feb. 1986	3200	3000	300	8
Mar. 1986	3100	2900	200	9
Apr. 1986	3100	2800	200	7
May 1986	3000	2800	200	7
	12,400	11,500	900	

* Due to rounding of all numbers at 100, there are some inconsistencies. The percentage was calculated using unrounded numbers.

Table 6. 1987 Panel: Sample Size, by Month and Interview Status

Household Units Eligible				Nonresponse Rate (%)
Month	Total	Interviewed	Noninterviewed	
Feb. 1987	3100	2900	200	7
Mar. 1987	3200	2900	200	7
Apr. 1987	3000	2900	200	6
May 1987	3200	3000	200	8
	12,500	11,700	800	

* Due to rounding of all numbers at 100, there are some inconsistencies. The percentage was calculated using unrounded numbers.

Sample loss at Wave 1 of the 1986 and 1987 Panels was about 7% and increased to roughly 19% at the end of Wave 5 of the 1986 Panel and to roughly 18% at the end of Wave 5 for the 1987 Panel. Further noninterviews increased the sample loss about 1% for each of the remaining waves.

Some respondents do not respond to some of the questions. Therefore, the overall nonresponse rate for some items such as income and other money related items is higher than the nonresponse rates in the above tables.

The Bureau uses complex techniques to adjust the weights for nonresponse, but the success of these techniques in avoiding bias is unknown.

Unique to the 1986 Panel, maximum telephone interviewing was tested in Waves 2, 3, and 4. Specifically, half of the sample in rotations 4 and 1 of Wave 2, rotations 2 and 3 of Wave 3 and rotations 2, 3, and 4 of Wave 4 were designated for telephone interviews. Analysis has not yet been completed so the effect on data quality is not yet known. Hence, caution should be used when interpreting analytical results, especially for Waves 2 through 4 of the 1986 panel. Again, this test was conducted in the 1986 panel only and will have no bearing on the 1987 Panel data.

Comparability With Other Statistics.

Caution should be exercised when comparing data from these files with data from other SIPP products or with data from other surveys. The comparability problems are caused by sources such as the seasonal patterns for many characteristics, definitional differences, and different nonsampling errors.

Sampling Variability.

Standard errors indicate the magnitude of the sampling variability. They also partially measure the effect of some nonsampling errors in response and enumeration, but do not measure any systematic biases in the data. The standard errors for the most part measure the variations that occurred by chance because a sample rather than the entire population was surveyed.

Confidence Intervals.

The sample estimate and its standard error enable one to construct confidence intervals, ranges that would include the average result of all possible samples with a known probability. For example, if all possible samples were selected, each of these being surveyed under essentially the same conditions and using the same sample design, and if an estimate and its standard error were calculated from each sample, then:

1. Approximately 68 percent of the intervals from one standard error below the estimate to one standard error above the estimate would include the average result of all possible samples.
2. Approximately 90 percent of the intervals from 1.6 standard errors below the estimate to 1.6 standard errors above the estimate would include the average result of all possible samples.
3. Approximately 95 percent of the intervals from two standard errors below the estimate to two standard errors above the estimate would include the average result of all possible samples.

The average estimate derived from all possible samples is or is not contained in any particular computed interval. However, for a particular sample, one can say with a specified confidence that the average estimate derived from all possible samples is included in the confidence interval.

Hypothesis Testing.

Standard errors may also be used for hypothesis testing, a procedure for distinguishing between population parameters using sample estimates. The most common types of hypotheses tested are 1) the population parameters are identical versus 2) they are different. Tests may be performed at various levels of significance.

SOURCE AND ACCURACY

where a level of significance is the probability of concluding that the parameters are different when, in fact, they are identical.

To perform the most common hypothesis test, compute the difference $X_A - X_B$, where X_A and X_B are sample estimates of the parameters of interest. A later section explains how to derive an estimate of the standard error of the difference $X_A - X_B$. Let that standard error be s_{DIFF} . If $X_A - X_B$ is between -1.6 times s_{DIFF} and +1.6 times s_{DIFF} , no conclusion about the parameters is justified at the 10 percent significance level. If on the other hand, $X_A - X_B$ is smaller than -1.6 times s_{DIFF} or larger than +1.6 times s_{DIFF} , the observed difference is significant at the 10 percent level. In this event, it is commonly accepted practice to say that the parameters are different. Of course, sometimes this conclusion will be wrong. When the parameters are, in fact, the same, there is a 10 percent chance of concluding that they are different.

Note when using small estimates.

Because of the large standard errors involved, there is little chance that summary measures would reveal useful information when computed on a smaller base than 200,000. Also, care must be taken in the interpretation of small differences. For instance, in case of a borderline difference, even a small amount of nonsampling error can lead to a wrong decision about the hypotheses, thus distorting a seemingly valid hypothesis test.

Standard Error Parameters and Tables and Their Use.

Most SIPP estimates have greater standard errors than those obtained through a simple random sample because clusters of living quarters are sampled. To derive standard errors that would be applicable to a wide variety of estimates and could be prepared at a moderate cost, a number of approximations were required. Estimates with similar standard error behavior were grouped together and two parameters (denoted "a" and "b") were developed to approximate the standard error behavior of each group of estimates. These "a" and "b" parameters are used in estimating standard errors and vary by type of estimate and by subgroup to which the estimate applies. Table 9 provides base "a" and "b" parameters to be used for estimates in this file.

The factors provided in table 10 when multiplied by the base parameters for a given subgroup and type of estimate give the "a" and "b" parameters for that subgroup and estimate type for the specified reference period. For example, the base "a" and "b" parameters for total income of households are -0.0001168 and 10,623, respectively.

For Wave 1 the factor for October 1985 is 4 since only 1 rotation of data is available. So, the "a" and "b" parameters for total household income in October 1985 based on Wave 1 are -0.0004672 and 42,492, respectively. Also for Wave 1, the factor for the first quarter of 1986 is 1.2222 since 9 rotation months of data are available (rotations 1 and 4 provide 3 rotations months each, while rotations 2 and 3 provide 1 and 2 rotation months, respectively). So, the "a" and "b" parameters for total household income in the first quarter of 1986 are -0.0001428 and 12,983, respectively for Wave 1.

The "a" and "b" parameters may be used to calculate the standard error for estimated numbers and percentages. Because the actual standard error behavior was not identical for all estimates within a group, the standard errors computed from these parameters provide an indication of the order of magnitude of the standard error for any specific estimate. Methods for using these parameters for computation of approximate standard errors are given in the following sections.

For those users who wish further simplification, we have also provided general standard errors in tables 11 through 14 for making estimates with the use of data from all four rotations. Note that these standard errors must be adjusted by a factor from table 9. The standard errors resulting from this simplified approach are less accurate. Methods for using these parameters and tables for computation of standard errors are given in the following sections.

Standard errors of estimated numbers.

The approximate standard error, s_x , of an estimated number of persons, households, families, unrelated individuals and so forth, can be obtained in two ways. Both apply when data from all four rotations are used to make the estimate. However, only the second method should be used when less than four rotations of data are available for the estimate. Note that neither method should be applied to dollar values.

It may be obtained by the use of the formula

$$s_x = fs \quad (1)$$

where f is the appropriate "f" factor from table 9, and s is the standard error on the estimate obtained by interpolation from table 11 or 12. Alternatively, s_x may be approximated by the formula

$$s_x = \sqrt{ax^2 + bx} \quad (2)$$

from which the standard errors in tables 11 and 12 were calculated. Here x is the size of the estimate and "a" and "b" are the parameters associated with the particular type of characteristic being estimated. Use of formula 2 will provide more accurate results than the use of formula 1.

Illustration.

Suppose SIPP estimates for Wave 1 of the 1986 panel show that there were 472,000 households with monthly household income above \$6,000. The appropriate parameters and factor from table 9 and the appropriate general standard error from table 11 are

$$a = -0.0001168 \quad b = 10,623 \quad f = 1.0 \quad s = 71,000$$

Using formula 1, the approximate standard error is

$$s_x = 71,000$$

Using formula 2, the approximate standard error is

$$\sqrt{(-0.0001168)(472,000)^2 + (10,623)(472,000)} \approx 70,600$$

Using the standard error based on formula 2, the approximate 90-percent confidence interval as shown by the data is from 359,000 to 585,000. Therefore, a conclusion that the average estimate derived from all possible samples lies within a range computed in this way would be correct for roughly 90% of all samples.

Standard Error of a Mean

A mean is defined here to be the average quantity of some item (other than persons, families, or households) per person, family, or household. For example, it could be the average monthly household income of females age 25 to 34. The standard error of a mean can be approximated by formula 3 below. Because of the approximations used in developing formula 3, an estimate of the standard error of the mean obtained from this formula will generally underestimate the true standard error. The formula used to estimate the standard error of a mean \bar{x} is

$$s_{\bar{x}} = \sqrt{\left(\frac{b}{y}\right) s^2} \quad (3)$$

where y is the size of the base, s^2 is the estimated population variance of the item and b is the parameter associated with the particular type of item.

SOURCE AND ACCURACY

The population variance s^2 may be estimated by one of two methods. In both methods we assume x_i is the value of the item for person i . To use the first method, the range of values for the item is divided into c intervals. The upper and lower boundaries of interval j are Z_{j-1} and Z_j , respectively. Each person is placed into one of c groups such that $Z_{j-1} < x_i \leq Z_j$.

The estimated population variance, s^2 , is given by the formula:

$$s^2 = \sum_{j=1}^c p_j m_j^2 - \bar{x}^2, \quad (4)$$

where p_j is the estimated proportion of persons in group j , and $m_j = (Z_{j-1} + Z_j) / 2$. The most representative value of the item in group j is assumed to be m_j . If group c is open-ended, i.e., no upper interval boundary exists, then an approximate value for m_c is

$$m_c = \frac{3}{2} Z_{c-1}.$$

The mean, \bar{x} , can be obtained using the following formula:

$$\bar{x} = \sum_{j=1}^c p_j m_j.$$

In the second method, the estimated population variance is given by

$$s^2 = \frac{\sum_{i=1}^n w_i x_i^2}{\sum_{i=1}^n w_i} - \bar{x}^2, \quad (5)$$

where there are n persons with the item of interest and w_i is the final weight for person i . The mean, \bar{x} , can be obtained from the formula

$$\bar{x} = \frac{\sum_{i=1}^n w_i x_i}{\sum_{i=1}^n w_i}.$$

Illustration

Suppose that based on Wave 1 data, the distribution of monthly cash income for persons age 25 to 34 during the month of January 1986 is given in table 7.

Table 7 Distribution of Monthly Cash Income Among Persons 25 to 34 Years Old

	Under \$300	\$300 to \$599	\$600 to \$899	\$900 to \$1,199	\$1,200 to \$1,499	\$1,500 to \$1,999	\$2,000 to \$2,499	\$2,500 to \$2,999	\$3,000 to \$3,499	\$3,500 to \$3,999	\$4,000 to \$4,999	\$5,000 to \$5,999	\$6,000 and over	
Total	39,851	1371	1651	2259	2734	3452	6278	5799	4730	3723	2519	2619	1223	1493
Thousands in interval														
Percent with at least as much as lower bound of interval	100.0	96.6	92.4	86.7	79.9	71.2	55.5	40.9	29.1	19.7	13.4	6.5	3.7	

Using formula 4 and the mean monthly cash income of \$2,530 the approximate population variance, s^2 , is

$$s^2 = \frac{1,371}{39,851} (150)^2 + \frac{1,651}{39,851} (450)^2 + \dots + \frac{1,493}{39,851} (9,000)^2 - (2,530)^2 = 3,159,887.$$

Using formula 3, the appropriate base "b" parameter and factor from table 9, the estimated standard error of a mean \bar{x} is

$$s_{\bar{x}} = \sqrt{\left(\frac{8,596}{39,851,000} \right) (3,159,887)} = \$26$$

Standard error of an aggregate.

An aggregate is defined to be the total quantity of an item summed over all the units in a group. The standard error of an aggregate can be approximated using formula 6.

As with the estimate of the standard error of a mean, the estimate of the standard error of an aggregate will generally underestimate the true standard error. Let y be the size of the base, s^2 be the estimated population variance of the item obtained using formula (4) or (5) and b be the parameter associated with the particular type of item. The standard error of an aggregate is:

$$s_x = \sqrt{(b)(y)s^2} \quad (6)$$

Standard Errors of Estimated Percentages.

The reliability of an estimated percentage, computed using sample data for both numerator and denominator, depends upon both the size of the percentage and the size of the total upon which the percentage is based. Estimated percentages are relatively more reliable than the corresponding estimates of the numerators of the percentages, particularly if the percentages are 50 percent or more, e.g., the percent of people employed is more reliable than the estimated number of people employed. When the numerator and denominator of the percentage have different parameters, use the parameter (and appropriate factor) of the numerator. If proportions are presented instead of percentages, note that the standard error of a proportion is equal to the standard error of the corresponding percentage divided by 100.

There are two types of percentages commonly estimated. The first is the percentage of persons, families or households sharing a particular characteristic such as the percent of persons owning their own home. The second type is the percentage of money or some similar concept held by a particular group of persons or held in a particular form. Examples are the percent of total wealth held by persons with high income and the percent of total income received by persons on welfare.

For the percentage of persons, families, or households, the approximate standard error, $s_{(x,p)}$, of the estimated percentage p can be obtained by the formula

$$s_{(x,p)} = fs \quad (7)$$

when data from all four rotations are used to estimate p .

In this formula, f is the appropriate "f" factor from table 9 and s is the standard error of the estimate from table 13 or 14. Alternatively, it may be approximated by the formula

$$s_{(x,p)} = \sqrt{\frac{b}{x} (p) (100-p)} \quad (8)$$

from which the standard errors in tables 13 and 14 were calculated. Here x is the size of the subclass of social units which is the base of the percentage, p is the percentage ($0 < p < 100$), and b is the parameter associated with the characteristic in the numerator. Use of this formula will give more accurate results than use of formula 7 above and should be used when data from less than four rotations are used to estimate p .

For percentages of money, a more complicated formula is required. A percentage of money will usually be estimated in one of two ways. It may be the ratio of two aggregates:

$$p_I = 100 (X_A / X_N)$$

or it may be the ratio of two means with an adjustment for different bases:

$$p_I = 100 (\hat{p}_A \bar{x}_A / \bar{x}_N)$$

where x_A and x_N are aggregate money figures, \bar{x}_A and \bar{x}_N are mean money figures, and \hat{p}_A is the estimated number in group A divided by the estimated number in group N. In either case, we estimate the standard error as

$$s_I = \sqrt{\left(\frac{\hat{p}_A \bar{x}_A}{\bar{x}_N}\right)^2 \left[\left(\frac{s_p}{\hat{p}_A}\right)^2 + \left(\frac{s_A}{\bar{x}_A}\right)^2 + \left(\frac{s_B}{\bar{x}_N}\right)^2 \right]}, \quad (9)$$

where s_p is the standard error of \hat{p}_A , s_A is the standard error of \bar{x}_A and s_B is the standard error of \bar{x}_B . To calculate s_p , use formula 8. The standard errors of \bar{x}_N and \bar{x}_A may be calculated using formula 3.

It should be noted that there is frequently some correlation between \hat{p}_A , \bar{x}_N , and \bar{x}_A . If these correlations are positive, then formula 9 will tend to overestimate the true standard error. If they are negative, underestimates will tend to result.

Illustration.

Suppose that, in the month of January 1986, 6.7 percent of the 16,812,000 persons in nonfarm households with a mean monthly household cash income of \$4,000 to \$4,999, were black. Using formula 8 and the "b" parameter of 11,565 and a factor of 1 for the month of January 1986 from table 9, the approximate standard error is

$$\frac{11,565}{\sqrt{(16,812,000)}} (6.7) (100-6.7) \approx 0.66 \text{ percent}$$

Consequently, the 90 percent confidence interval as shown by these data is from 5.6 to 7.8 percent.

Standard Error of a Difference.

The standard error of a difference between two sample estimates is approximately equal to

$$s_{(x-y)} = \sqrt{s_x^2 + s_y^2} \quad (10)$$

where s_x and s_y are the standard errors of the estimates x and y .

The estimates can be numbers, percents, ratios, etc. The above formula assumes that the correlation coefficient, r , between the characteristics estimated by x and y is zero. If r is really positive (negative), then this assumption will tend to cause overestimates (underestimates) of the true standard error.

Illustration.

Suppose that SIPP estimates show the number of persons age 35-44 years with monthly cash income of \$4,000 to \$4,999 was 3,186,000 in the month of January 1986 and the number of persons age 25-34 years with monthly cash income of \$4,000 to \$4,999 in the same time period was 2,619,000. Then, using parameters and factors from table 9 and formula 2, the standard errors of these numbers are approximately 164,000 and 149,000, respectively. The difference in sample estimates is 567,000 and, using formula 10, the approximate standard error of the difference is

$$\sqrt{(164,000)^2 + (149,000)^2} \approx 222,000$$

Suppose that it is desired to test at the 10 percent significance level whether the number of persons with monthly cash income of \$4,000 to \$4,999 was different for persons age 35-44 years than for persons age 25-34 years. To perform the test, compare the difference of 567,000 to the product $1.6 \times 222,000 = 355,200$. Since the difference is greater than 1.6 times the standard error of the difference, the data show that the two age groups are significantly different at the 10 percent significance level.

Standard Error of a Median.

The median quantity of some item such as income for a given group of persons, families, or households is that quantity such that at least half the group have as much or more and at least half the group have as much or less. The sampling variability of an estimated median depends upon the form of the distribution of the item as well as the size of the group. To calculate standard errors on medians, the procedure described below may be used.

SOURCE AND ACCURACY

An approximate method for measuring the reliability of an estimated median is to determine a confidence interval about it. (See the section on sampling variability for a general discussion of confidence intervals.) The following procedure may be used to estimate the 68-percent confidence limits and hence the standard error of a median based on sample data.

1. Determine, using either formula 7 or formula 8, the standard error of an estimate of 50 percent of the group;
2. Add to and subtract from 50 percent the standard error determined in step 1;
3. Using the distribution of the item within the group, calculate the quantity of the item such that the percent of the group owning more is equal to the smaller percentage found in step 2. This quantity will be the upper limit for the 68-percent confidence interval. In a similar fashion, calculate the quantity of the item such that the percent of the group owning more is equal to the larger percentage found in step 2. This quantity will be the lower limit for the 68-percent confidence interval;
4. Divide the difference between the two quantities determined in step 3 by two to obtain the standard error of the median

To perform step 3, it will be necessary to interpolate. Different methods of interpolation may be used. The most common are simple linear interpolation and Pareto interpolation. The appropriateness of the method depends on the form of the distribution around the median. If density is declining in the area, then we recommend Pareto interpolation. If density is fairly constant in the area, then we recommend linear interpolation. Note, however, that Pareto interpolation can never be used if the interval contains zero or negative measures of the item of interest. Interpolation is used as follows. The quantity of the item such that "p" percent own more is

$$X_{pN} = \exp \left[\frac{\ln \left(\frac{pN}{N_1} \right)}{\ln \left(\frac{N_2}{N_1} \right)} \ln \left(\frac{A_2}{A_1} \right) \right] A_1 \quad (11)$$

if Pareto Interpolation is indicated and

$$X_{pN} = \frac{pN - N_1}{N_2 - N_1} (A_2 - A_1) + A_1 \quad (12)$$

if linear interpolation is indicated, where N is the size of the group.

- | | |
|-----------------|--|
| A_1 and A_2 | are the lower and upper bounds, respectively, of the interval in which X_{pN} falls. |
| N_1 and N_2 | are the estimated number of group members owning more than A_1 and A_2 , respectively, |
| exp | refers to the exponential function and |
| Ln | refers to the natural logarithm function. |

Illustration.

To illustrate the calculations for the sampling error on a median, we return to the same table 7. The median monthly income for this group is \$2,158. The size of the group is 39,851,000.

1. Using the formula 8, the standard error of 50 percent on a base of 39,851,000 is about 0.7 percentage points.
2. Following step 2, the two percentages of interest are 49.3 and 50.7.
3. By examining table 7, we see that the percentage 49.3 falls in the income interval from 2000 to 2499. (Since 55.5% receive more than \$2,000 per month, the dollar value corresponding to 49.3 must be between \$2,000 and \$2,500). Thus, $A_1 = \$2,000$, $A_2 = \$2,500$, $N_1 = 22,106,000$, and $N_2 = 16,307,000$.

In this case, we decided to use Pareto interpolation. Therefore, the upper bond of a 68% confidence interval for the median is

$$\$2,000 \exp \left[\frac{(.493) (39,851,000)}{22,106,000} \right] \left/ \frac{16,307,000}{22,106,000} \right. \ln \frac{2,500}{2,000} = \$2181$$

Also by examining table 7, we see that 50.7 falls in the same income interval. Thus, A_1 , A_2 , N_1 , and N_2 are the same. We also decided to use Pareto interpolation for this case. So the lower bound of a 68% confidence interval for the median is

$$\$2,000 \exp \left[\frac{(.507) (39,851,000)}{22,106,000} \right] \left/ \frac{16,307,000}{22,106,000} \right. \ln \frac{2,500}{2,000} = \$2136$$

Thus, the 68-percent confidence interval on the estimated median is from \$2136 to \$2181. An approximate standard error is

$$\frac{\$2181 - \$2136}{2} = \$23$$

Standard Errors of Ratios of Means and Medians.

The standard error for a ratio of means or medians is approximated by:

$$s_{\frac{x}{y}} = \sqrt{\left(\frac{x}{y}\right)^2 \left[\left(\frac{s_y}{y}\right)^2 + \left(\frac{s_x}{x}\right)^2 \right]} \quad (13)$$

where x and y are the means, and s_x and s_y are their associated standard errors. Formula 13 assumes that the means are not correlated. If the correlation between the population means estimated by x and y are actually positive (negative), then this procedure will tend to produce overestimates (underestimates) of the true standard error for the ratio of means.

Review of 1986 SIPP Panel Wave 2 Topical Module
on Employment History

The attached table shows items identified as having very high imputation rates. Group 1 shows items with imputation rates greater than 14 percent while Group 2 has imputation rates between 10 and 14 percent.

The imputation-rate table displays a large disparity between the weighted and unweighted rates for source code item 8260 (unweighted is 22 percent; weighted is 14.7 percent). No other item in the module showed such a disparity.

Users should use caution with results of data based on items listed in the attached table.

<u>Item Source Code</u>	Imputation Rate	
	<u>Unweighted</u>	<u>Weighted</u>
<u>Group 1</u>		
8218	16.2%	16.5%
8222	32.6	33.3
8228	24.5	25.3
8230	14.8	14.8
8250	26.2	26.5
8256	16.1	16.9
8260	22.0	14.7
8264	22.3	22.6
<u>Group 2</u>		
8252	11.6	11.8
8258	12.1	12.3
8268	13.4	13.5
8270	10.9	10.9

Subject: Review of Part C (Work Disability History) of Topical
 Module for Panel 86 Wave 2

A) Skip Patterns

All responses are consistent with respect to the skip patterns that were followed on the questionnaire.

B) Imputation Rates

The imputation rates are shown in attachment A. The imputation rates for source codes SC8310, SC8318, and SC8334 range between 36.5% and 47.0%. In my opinion, the nonresponse rates for these items are much too high for the data to be reliable. All three of these items ask about the month that the person first became disabled. If the disability occurred several years ago, it is unlikely that the respondent was able to recall the exact month of the event. In the 1984 panel, the month was asked only if the limitation had occurred in the past year. In that panel, the imputation rates for the corresponding items were only 7%. Since the information on the month that the limitation began is only useful if the limitation occurred in the past year, I am proposing that the month be blanked if the year is not equal to 1986. If we don't do this edit, then a data user's memo should be issued informing the users about the high imputation rates for these three items. In the future, I would like to see questions in the work disability history module redesigned so that the month of the disability occurred be asked only if the disability occurred within the previous year. All other imputation rates are within a reasonable range.

Weighted Estimates

Weighted estimates of the number and percentage of persons aged 16 to 64 with a work disability from Panel 86 Wave 2 were compared to Panel 84 Wave 3 (attachment B). The percentage of persons with a work disability in wave 2 of the 1986 panel are similar to these from wave 3 of the 1984 panel.

SIPP DATA REVIEW: Panel 1986 Wave 2 - Education & Training History

INTRODUCTION

This report provides a review of data quality of the Wave 2 Education and Training History topical module from the 1986 panel of the Survey of Income and Program Participation (SIPP). The questions concern receipt of the highest degree beyond high school, the field in which the degree was awarded, and the dates during which schooling occurred. The training history section asks about participation in specific work training programs, as well as participation in general work training activities, when and where the training occurred, how long it lasted, and the source of payment for this training.

SAMPLE ATTRITION

A rectangular data file of the wave 2 education and training history data was constructed using the SIPPER program. The file contains 24,446 person records; the universe of interest for tabulation are those persons who have non-zero weights in the interview month, which is 22,908 cases. (In addition, there are 5 zero-weight cases who were interviewed - likely 200+ level persons.)

The number of households eligible for interviewing in wave 2 was 12,562. Of these, 10,974 or about 87%, were successfully interviewed. Within households there is also loss of persons. As with entire households, this loss may be due to refusals, or because a given individual has moved and cannot be followed. The loss of persons in interviewed households in wave 2 (for the interview month) was 1533 persons, or 6.3% of the eligible person population. This includes persons who may have been in sample for part of the wave, but who are out of sample by the interview month. (Another 5 persons have interview data, but also have a zero-weight for the interview month. Since the topical module is referenced to the interview month, calculating loss in terms of persons with a zero weight in that month is a reasonable method.) Table 1 shows the pattern of loss for several basic demographic factors. Tests for significant patterns of loss in the sample data from the prior wave are made using a chi-square test that has been adjusted for sample design. (The simple adjustment is to divide the calculated chi-square by 3.) Using this method we find significant loss only for persons of Hispanic origin.

ITEM AND MODULE NONRESPONSE

In addition to the loss of data caused by noninterviewed households and persons, information is also lost because of simple nonresponse. Persons may not respond for a variety of reasons, and nonresponse may occur for the entire topical module, or only for selected items. In Wave 2, 784 of the non-zero weight persons, about 3.4% of the "active" sample did not respond to the entire module. Of these, 559 (71%) were in fact Type 2 noninterview cases, that is, they were not interviewed at all (either because they refused, or an interview could not, for whatever reason, be arranged). Table 2 summarizes the distribution of module nonrespondents by several basic demographics. Total nonresponse appears to have been somewhat more common among nonWhites, younger persons, males, and persons with 9-12 years of schooling.

While total module nonrespondents must have some data created for them, the overall level of imputation and editing is reasonable. In many situations, a "complete" case may amount to only several answered items. In terms of imputations, overall rates are quite low. However, in this module some instances of missing data are not handled with an imputation, but with a structured edit procedure, which contributes to the low imputation rate. Table 3 shows data for both imputed and some edited fields. As can be seen, imputation levels are for the most part low, but changes or assignment of values due to editing occur in larger magnitude for some items. For example, 916 cases (4% of the total) required an edited value for source code 8400, the lead-in check item for this section. Some items, such as dates, are especially prone to edit modification, either because they were not recorded at all, or because the sequence of dates in this section resulted in inconsistent answers (e.g., receiving a highest degree substantially before a lower degree). One problem in collecting multiple date data such as these is determining which items are "true" when the date sequences are unreasonable. We have used a combination of the actual dates reported and other related information (such as years of schooling attended) to come up with edited sequences where necessary.

SURVEY ESTIMATES

The comparison of weighted survey estimates to estimates derived from other sources acts as another check of the general quality of the data. Sample loss and nonresponse notwithstanding, if editing, imputation and weighting procedures are properly applied the final weighted data should compare favorably, at least in univariate or bivariate context, with other known estimates of the same phenomenon. Consideration is given here to several of the main substantive items collected in the module.

1. Educational Attainment/Degrees

Since the module is about educational history, one basic aspect of these data should be the detailing of the educational attainment structure of the population. In the SIPP there are 2 sources of these data: the control card, which collects the traditional "highest grade or year of school completed" item, and the topical module, which asks about the highest degree beyond a high school diploma that the individual has earned. The table below compares these two estimates with one derived from the March 1986 Current Population Survey, based also on the traditional "years completed" item. The table shows that there is a high degree of correspondence (in proportionate terms) between the 3 sources, but it is not exact. Part of the variation, of course is sample and response variance, but the larger levels of difference (notably for degrees beyond a Bachelor's) is attributable to the fact that years of schooling do not map neatly into degrees of these types.

Comparison of Educational Attainment Distributions

Level	SIPP		SIPP "years"	March 86 CPS	
	Highest Degree				
PhD.	1008				
Prof.	1527	8458 (4.6)	12728 (6.8)	14445 (7.8)	C5+

No deg	32060				
HS only	68972	(37.2)	69167 (37.0)	67406 (36.3)	12
LT HS	50585	(27.3)	53113 (28.4)	54312 (29.3)	LT 12

(Numbers in thousands)

The next table compares the number of degrees (actually, "highest degrees") obtained in the period 1981-1985 to the estimates as calculated from the Department of Education administrative estimates. There are multiple reasons why these estimates should not be exactly the same (e.g., timing and definitional differences, sample variation), however, relative magnitude and proportion should be preserved. In fact, this is what the data show. Apart from a serious difference in the Associate level (which may be accounted for in part by the SIPP inclusion of an additional category of "vocational certificate or diploma"), the distributions are strikingly similar. Of course, the SIPP data cannot be expected to yield very reliable time-

specific estimates, perhaps even for large intervals such as 5-10 years, but this table indicates the data are not widely variant for this 5-year period.

Degrees Awarded 1981-1985

Degree	SIPP Estimate	Dept. of Education
PhD.	138 (1.7)	165 (1.8)
Prof.	297 (3.6)	366 (4.1)
Mas.	1321 (16.0)	1452 (16.1)
Bach.	4344 (52.5)	4811 (53.4)
Assoc.	1467 (17.7)	2214 (24.6)
Voc.	708 (8.6)	---

(Numbers in thousands)

2. Degree Fields

The SIPP also asks respondents to report the field in which their highest degree was earned. Respondents are asked to choose from a list of 20 field categories the one which best identifies their field of study. The distributions of fields by degrees yield many estimates which are relatively small. Given the sampling variance of the estimates, one could not attempt to make reasonable comparisons to other known estimates, if they in fact existed. However, the general proportionate distribution of fields and degrees seems reasonable when compared to those estimated from the same questions in the 1984 panel of SIPP. In addition, looking within a specific field or degree, cells of large magnitude make intuitive sense; most professional degrees are reported by persons who studied the field of law, medicine or dentistry; most vocational certificate or diploma recipients report a field of business, nursing, technical health or "vocational studies". In short, the degree/field data do not appear "unreasonable".

3. Job Training

Job training in this module is ascertained through the use of a very general question which asks, "Has ... ever received training designed to help find a job, improve job skills or learn a new job?" As one might expect, this question elicits a large number of positive responses among the adult population, that is, a weighted estimate of approximately 38 million persons ages 16 to 64. Given that this question is so general, one should accept that these data may be useful in providing a general image of work training, but not the fine detail that one would expect from a survey solely dedicated to this topic or, more importantly, to any of the specific programs that are mentioned in the follow-up question.

Five specific work training sponsors are identified. Two of these, CETA and JTPA, represent the same program, since CETA was succeeded by JTPA. The SIPP and "administrative" estimates (numbers in 1000's) for these programs are:

	SIPP	Administrative Est.
JTPA	1,042	1,900
CETA	1,851	20-25,000
WIN	545	2,000
Trade Adjustment	139	88
Veteran's Training	1,316	485 - 1,710

There are serious differences between the estimates from SIPP and those obtained from administrative sources. The reasons for this draw into question both the SIPP and the administrative figures. Generally, the agencies administering these programs do not have a single, handy number which summarizes the number of participants. More likely, they have a series of estimates, of unknown quality, of the many different "subprograms" which may be authorized (but not known) under one generic label. Often, these programs are administered at a state (or lower) level, with the name(s) of the actual programs determined at that point. In the case of JTPA for example, the total number of specific named programs operating under the enabling legislation is at least several hundred, and is likely more than one thousand in number (this was the conclusion of the analysts I spoke with at the Dept. of Labor). CETA is believed to have had between 20 and 25 million participants, but there is no data on how many of these persons actually received any kind of "job training", or how many knew they were a part of the CETA program. In a context such as this it is well beyond the scope of the administering agency to have a good count, but more importantly, it is a random guess as to whether or not any actual participant of this program will know that he/she participated in it. For some of these programs, participation is "automatic" when the individual applies for unemployment, for example, and is sent to a one or two-day lecture on "tips on job-hunting" before becoming eligible for benefits. While the "administrative" estimate records this person, the person themself does not even know it happened.

Similarly, many programs do more than provide "job training", but have no way of differentiating their counts of participants. This to some extent characterizes the discrepancies in the WIN estimates. There are about 1.5 million WIN participants PER YEAR, and somewhere between 10 and 50% get "some kind" of training. How does the SIPP estimate compare? One cannot really say, because the comparison is fallacious. Other programs, such as Trade Adjustment Assistance, train far too few people to even be included in this section, and should be dropped as specific response categories.

Estimates of Veteran's training are also somewhat unclear. Depending upon which program one concentrates on, the SIPP estimate may be too high or too low. The administrative estimate of a half to one and a half million is based on several different programs, any of which might reasonably define "work training". Not included is the estimate of persons who attend school (of many different types) under the auspices of the GI Bill or some other Veteran's aid.

Analysis and use of the work training data needs to recognize that these are seriously limited and distorted in certain respects. Having said this, it is not the case that the data have no use. Analysis of individuals who report some kind of program training (whatever it was), or who report that it was paid for by the government, may tell us important things about this subpopulation, especially with respect to them in the context of other activities. But researchers should avoid the desire to produce estimates and analyses of specific training programs from these data.

SUMMARY

The data from this module appears, in general terms, to be reasonable in terms of its weighted distributions. Users of these data should take note of two characteristics which may advise caution on their part, however. First, many of the dates for education events have been modified because of the editing consistency procedures. This is necessary because so many dates have been left blank, or because respondents have answered "don't know". We have avoided imputation in these cases, since event dates must be constrained by other surrounding dates; attempts to build an accurate imputation matrix would result in a huge table with few "donor" cells. Thus, the editing procedure achieves in essence what the detailed imputation would; i.e., donated dates based on the value of other relevant criteria. Nevertheless, while date consistency is achieved, a large proportion of cases will exhibit the same timing patterns in the dating of events.

The second problem in these data concerns the work training section, and the reports of specific sponsors of such training. SIPP estimates are widely discrepant of other estimates, but there is no reason to believe that the other estimates are any more valid than those obtained in the SIPP. The very general nature of the section on work training makes these data useful only in the most general of terms. Analysis of specific programs should not be undertaken with these data.

SIPP DATA REVIEW: Panel 1986 Wave 2 - Family Background

INTRODUCTION

This report provides a review of data quality of the Wave 2 Family Background topical module from the 1986 panel of the Survey of Income and Program Participation (SIPP). The questions concern number of siblings, structure of the household, and the education and occupation of parents - all measured as of the respondent's sixteenth birthday.

SAMPLE ATTRITION

A rectangular data file of the wave 2 education and training history data was constructed using the SIPPER program. The file contains 24,446 person records; the universe of interest for tabulation are those persons who have non-zero weights in the interview month, which is 22,908 cases. (In addition, there are 5 zero-weight cases who were interviewed - likely 200+ level persons.)

The number of households eligible for interviewing in wave 2 was 12,562. Of these, 10,974 or about 87%, were successfully interviewed. Within households there is also loss of persons. As with entire households, this loss may be due to refusals, or because a given individual has moved and cannot be followed. The loss of persons in interviewed households in wave 2 (for the interview month) was 1533 persons, or 6.3% of the eligible person population. This includes persons who may have been in sample for part of the wave, but who are out of sample by the interview month. (Another 5 persons have interview data, but also have a zero-weight for the interview month. Since the topical module is referenced to the interview month, calculating loss in terms of persons with a zero weight in that month is a reasonable method.) Table 1 shows the pattern of loss for several basic demographic factors. Tests for significant patterns of loss in the sample data from the prior wave are made using a chi-square test that has been adjusted for sample design. (The simple adjustment is to divide the calculated chi-square by 3.) Using this method we find significant loss only for persons of Hispanic origin.

ITEM AND MODULE NONRESPONSE

In addition to the loss of data caused by noninterviewed households and persons, information is also lost because of simple nonresponse. Persons may not respond for a variety of reasons, and nonresponse may occur for the entire topical module, or only for selected items. In Wave 2, 514 of the non-zero weight persons, about 3.5% of the "active" sample did not respond to the entire module. Of these, 368 (72%) were in fact Type 2 noninterview cases, that is, they were not interviewed at all (either because they refused, or an interview could not, for whatever reason, be arranged). Table 2 summarizes the distribution of module nonrespondents by several basic

demographics. Total nonresponse appears to have been somewhat more common among nonWhites, younger persons, males, and persons with 9-12 years of schooling.

In addition to module nonresponse there is also item nonresponse. Only one item, source code 8562, is imputed in this module. In this module, item nonresponse or values of "don't know" are edited to or left as a "don't know". Table 3 shows the edit and imputation rates for the items in the module. Generally, the rates are quite low, especially when one considers that most of the changes are due to type Z cases. Uses should note that even though edited levels of "don't know" responses are small, total levels may be much higher (because these values have not been changed via imputation). For example, about 6% of the applicable cases had a value of "don't know" edited for source code 8572 (father's education), but 22% of all the applicable cases are "don't knows", since this is a commonly-given response, given the type of question. Imputation of these items would defeat their purpose, the ability to measure intergenerational shifts in educational attainment. In short, while a relatively small proportion of cases have required editing, legitimate lack of knowledge on the part of many respondents results in moderate levels of missing data.

SURVEY ESTIMATES

The comparison of weighted survey estimates to estimates derived from other sources acts as another check of the general quality of the data. Sample loss and nonresponse notwithstanding, if editing, imputation and weighting procedures are properly applied the final weighted data should compare favorably, at least in univariate or bivariate context, with other known estimates of the same phenomenon. In the case of these data, however, there are no corresponding external estimates. Some assessment can be made on the basis of the distributions of items across age cohorts, but these are general substantive comparisons, at best.

For example, the average total number of brothers and sisters reported by the four 10-year age cohorts of 25-34, 35-44, 45-54 and 55-64 are 3.3, 3.1, 3.4, and 3.5. Intuitively, the values and pattern of these seem reasonable, that is, declining family sizes up to the youngest cohort, which coincides pretty much with the baby boom. The actual sibling sizes reported are larger than the family sizes of the periods, however. This "discrepancy" occurs for two main reasons: (1) Estimates of larger families are essentially over-represented in this sample of persons, while families with only one child are exactly represented. As such, the values of sibling size are biased upwards by the implicit oversampling of members of larger families. (2) The SIPP values are derived from a cross-sectional sample of survivors (of varying lengths of time) from various time periods. The differential mortality (due to age) means that more recent period effects dominate the overall estimate. Despite these problems, it appears that these estimates are reasonable.

This problem of differential sampling probabilities characterizes all of the data collected in this module. (Note

that it is only a "problem" in terms of deriving some comparative estimate; the data themselves are not in error.) For example, the distribution of fathers' (actually male heads) educational attainment does not (and cannot) match any given cross-sectional estimate of attainment. An approximate distribution can be derived based on educational attainment distributions of "fathers" (males of a given age) at multiple points in the past. This partially resolves the temporal nature of the sampling problem, but does not accommodate the "multiplicity" aspect caused by differential family size (and in this case compounded by the relationship between differential family size and fathers' education).

Despite this apparent insurmountable obstacle, the casual comparison of reported fathers' educational attainment to one derived from compounded multiple cross-sectional estimates of males likely to be fathers of 16-years olds (defined as males ages 45-54), shows a reasonable correspondence.

Educational Attainment of Fathers							
	0 yrs	1-8	9-11	12	C1-3	C4	C5+
SIPP	2.7	32.9	12.5	29.3	8.4	8.1	6.1
Derived	1.5	37.2	17.7	22.5	9.1	5.5	5.7

Additionally, examination of fathers' attainment for each specific 10-year age cohort shows the gradual increase in aggregate attainment levels that is characteristic of the historical trend during this period.

Users should note that levels based on the SIPP data are based on only those cases where an educational level was reported for the father. Since about 25% of eligible cases are "don't know" on this item, the missing data is actually a more serious issue than non-representativeness of the sample.

Another point of data evaluation concerns the reports of occupations for fathers and mothers. A response category allows the answer, "did not have a paying job or business" to be recorded directly. This category is chosen much more frequently for mothers than it is for fathers (as we might expect), and for mothers, the estimated proportion decreases (from 68 to 52%) over time (as we would also expect, given the trends in womens' employment over the past fifty years.)

SUMMARY

Evaluation of data such as these is not straightforward, since there are no other estimates for direct comparison. Assumptions can be made to derive approximates, but even these are very rough. Given these limitations, however, the distributions of these data appear reasonable. Users should note that in this module answers of "don't know" and nonresponses have not been imputed. For some items this will mean substantial proportions (approximately 25%) of missing data.

Subject: Review of the SIPP 1986 Panel Wave 2 Marital
 History Data

The numbers of marriages by year of marriage reported in wave 2 of the 1986 panel look, in general, very reasonable when compared to the vital records from NCHS (see table 1). The last complete year of data (1985) looks a little low when compared to the vital records (2,200,000 marriages versus 2,413,000), but the estimate of marriages occurring in 1985 is much improved over the comparable estimates from both wave 4 of the 1985 panel (2,072,000) and wave 8 of the 1984 panel (1,908,000). The numbers of marriages occurring in both 1970 and 1975 as reported in wave 2 of the 1986 panel are also low when compared to the vital records.

Divorces by year of divorce from wave 2 of the 1986 panel are generally lower than those reported in the vital records from NCHS (see table 2). The wave 2 (1986 panel) divorce estimates are more complete for most years than the comparable estimates from wave 4 of the 1985 panel and wave 8 of the 1984 panel, however. This is especially true for the latest complete year of divorces collected (1985) where the 1986 panel count of divorces (1,091,000) was much closer to the vital records (1,190,000) than either the 1985 panel count (966,000) or the 1984 panel count (765,000) for the same year.

Year of marriage in wave 2 of the 1986 panel was allocated 9.9 percent of the time for males and 7.3 percent of the time for females. This compares favorably to the allocation rates for wave 4 of the 1985 panel (11.6 percent for males and 7.4 percent for females). The year of first marriage allocation rates for wave 2 of the 1986 panel look reasonable (see table 3). They are similar, in general, to the comparable rates for wave 4 of the 1985 panel and wave 8 of the 1984 panel.

The month of marriage estimates for 1984 and 1985 from both 1986 wave 2 and 1985 wave 4 bounce around quite a bit in comparison to the NCHS vital records by month (see table 4). Month of marriage and month of divorce data should probably not be used by themselves, but rather only to calculate derived measures such as length of marriage and interval between first divorce and second marriage.

The number of times married estimates from wave 2 of the 1986 panel of SIPP appear to be reasonable, in general, both when compared to the estimates from wave 4 of the 1985 panel and to the estimates from the June 1985 marital history supplement to the Current Population Survey (see table 5). When evaluating these data as well as the data in table 6, it is important to keep in mind that 1985 wave 4 was in the field from January 1986 through April 1986 while 1986 wave 2 was in the field from June 1986 through September 1986. The discrepancies in the percent distribution that do exist between 1986 wave 2 and the June 1985 CPS may well be at least partially explained by the time difference between the surveys. Never married is also available from the March 1986 CPS. The March 1986 CPS estimates for never-married males and females are 26,570,000 (30.0 percent) and 21,960,000 (22.8 percent), respectively. These 1986 CPS estimates are quite close to the 1986 wave 2 estimates of 26,684,000 (30.1 percent) and 22,280,000 (23.0 percent).

The distribution and numbers of persons by current marital status from wave 2 of the 1986 panel also looks quite reasonable (see table 6). The estimates of persons who are single (never married), married (spouse present), and divorced look very good in comparison to the CPS estimates for March 1986. The married (spouse absent) estimate (5,244,000) looks a little low in comparison to the comparable estimates from 1985 wave 4 (5,670,000) and the March 1986 CPS (5,918,000). In contrast, the estimate of currently divorced persons (14,258,000) looks a little high in comparison to 1985 wave 4 (13,253,000) and the March 1986 CPS (13,555,000).

Subject: 1986 SIPP Wave 2 Data on Migration

The 1986 SIPP Wave 2 data from the Migration History topical module appear internally consistent, have reasonable imputation rates, and provide acceptable estimates of number of movers. All items except 8732 are internally consistent, and DSD has been notified of the problem with that item. The imputation rates are less than 5 percent except for one item on month and year of previous move, for which 9.9 percent of the responses were imputed. The imputations for that item appear to be distributed equitably among the possible responses and should not bias the data.

The estimates of number of recent movers and rate of moving from the 1986 SIPP data appear reasonable in comparison with estimates from the Current Population Survey. The number of persons 15 years and older who changed residence between April 1985 and March 1986 was 33,633,000 based on the 1986 SIPP module. The corresponding estimate from the CPS was 33,070,000 (see table A). The estimated mobility rate (proportion of persons moving) for 1985-86 was 18.1 percent from the SIPP and 17.9 percent from the CPS. The estimates of number of movers and rate of moving from the two data sources are not statistically different at the 90 percent confidence level.

The sex and age compositions of recent movers from the two surveys are also similar (see table B). The SIPP estimates include a slightly higher proportion of females among recent movers and a slightly lower proportion of males, as compared to the CPS, but the differences are not statistically significant. The proportions of movers by age group also correspond fairly closely; the only significant differences in table B are for movers of both sexes in age groups 15-29 and 65 and over.

The geography of recent moves from the SIPP cannot be strictly compared with the CPS estimates because about 13 percent of the SIPP movers in the CPS reference period of April 1985 to March 1986 also made a later move (after March 1986). Geographical information in the SIPP module is only obtained for the most recent move, in this case the move after March 1986, and therefore is unavailable for 13 percent of the group being compared to the CPS. A rough evaluation of type of move, i.e., long or short distance or from abroad, can be made by comparing the data for the 87 percent of SIPP movers whose last move was made during the CPS reference period with that of the CPS movers.

Percentage distributions of type of move for the two groups are shown in table C.

The geography of moves from the two surveys are not as similar as the number, age, and sex of recent movers. About 71 percent of recent moves reported in the SIPP were local moves (intracounty) compared with 60 percent reported in the CPS. The estimates of longer distance moves (different county of same state, different state, and from abroad) were lower in the SIPP than in the CPS. All of the geographic differences between the two surveys that are shown in table C are statistically significant. A partial explanation for the differences may lie in the procedures use to determine type of move. The SIPP sample is asked whether the previous residence was in the same county, same state but different county, etc. CPS respondents are asked to provide the city and state or foreign country of previous residence and the type of move is determined by a coding operation. SIPP attrition may offer additional explanation for the higher proportion of local movers in the SIPP sample, since the SIPP probably does a better job of retaining short-distance movers than long-distance movers.

The items on the topical module that do not relate to recent migration, such as residence in other states and countries and naturalization, cannot be readily compared against independent sources. They appear reasonable, however, as well as being internally consistent and having low imputation rates.

Subject: Review of SIPP 1986 Panel, Wave 2 Fertility History Module

Fertility history data from the SIPP 1986 Panel, Wave 2 topical module appear to be of very good quality. Both the retrospective items and current fertility indicators accurately represent current fertility levels and variations when compared to other data sources.

THE ITEMS

Children ever born. Distributions of children ever born from SIPP based on June–September 1986 interviews are very similar to results based on the June 1986 Current Population Survey (CPS). Nonresponse rates were significantly lower for ever–married women in SIPP relative to the CPS but were higher in SIPP for never–married women. Overall, 1986 Wave 2 panel nonresponse rates for all women were lower than in previous SIPP panels where the fertility history items were asked in later waves. Moving the personal items to Wave 2 appears to be associated with improvements in response rates, as previously predicted in prior data reviews.

First births. Estimates of annual numbers of first births from SIPP are shown in table 2 along with Vital Statistics estimates for the period 1960–1985. First birth data from the SIPP are categorized by place of birth status of the mother to take into account births reported by women in the survey which may have been born overseas, and hence not recorded in the vital registration system. (Place of birth information was obtained from the migration history module in Wave 2.)

When the births to foreign born women who entered the U.S. before their child's birth are added to births to native–born women, SIPP estimates tend to be at or slightly above Vital Statistics counts, most notably for the period 1970–74. One noteworthy feature of the 1986 Panel of fertility data is that cross–sectional estimates of births for periods close to the survey date are very well reported. Underreporting problems seemed to have plagued prior SIPP panels when retrospective items were asked further into the life of the panel.

Current Fertility. Current fertility data for women who had their last birth within one year of the interview date are shown in table 3. Comparable data are also shown for births occurring in calendar year 1986 from Vital Statistics records and from the June 1986 Current Population Survey.

Any apparent differences noted in the table are minimal and can easily be accounted for by sampling error or simply differences in the time frame of the birth estimates or restrictions in the age universe of the women in the two surveys (SIPP and CPS). Although it appears that both SIPP and CPS estimates undercount Hispanic births, this apparent discrepancy occurs because the Vital Statistics data are shown for only 23 States which have disproportionate shares of the total Hispanic population in the United States.

Table 3. (Continued)

Note: CPS data only collected for women 18 to 44 years old at interview date.

NA: Not available.

a Refers to second and higher order births.

b Refers to women 18-24 years old.

- 1/ Refers to births occurring in calendar year 1986.
- 2/ Refers to births occurring within 1 year of interview date. Interviews conducted June-September 1986 for SIPP and June 1986 for CPS.
- 3/ Vital statistics data refer to age at birth of child. SIPP and CPS data refer to age at survey date.
- 4/ Vital Statistics data refer to marital status of mother at time of child's birth. SIPP and CPS data refer to marital status of mother at survey date. Currently married includes married, spouse absent (including separated).
- 5/ Vital Statistics data refer to educational attainment of mother at time of child's birth for 47 States and D.C.; SIPP and CPS data refer to educational attainment of mother at survey date.
- 6/ Status at survey date.
- 7/ Vital Statistics data based on 23 States and D.C.; not stated reports for these States were not imputed.
- 8/ Includes persons born abroad of American parents for both SIPP and CPS data.

Subject: Review of the SIPP 1986 Panel Wave 2 Household
 Relationship Matrix Data

Attached are the results of our evaluation of the quality of the data from the SIPP 1986 panel, wave 2 detailed relationship matrix. The results are essentially the same as those for the 1984 panel, wave 8 and the 1985 panel, wave 2. In brief, they indicate that the quality of the data - at least in the macro-sense - is good.

The percent distribution of specified relationships to the person in column one (usually the householder) has remained very consistent over the three waves that this topical module has appeared on (see table 1). All of these SIPP topical modules in turn are consistent with the relationship to householder data reported in the 1980 Census. The degree of stability in these results strongly suggests that the SIPP data are of high quality.

The parent-child relationships reported in the topical module are also quite consistent between each of the SIPP waves (see table 2). They, in turn, closely follow the pattern displayed by data derived from the June 1980 Current Population Survey. This becomes even more apparent if the unknowns are distributed proportionately to the knowns (see table 3).

Table 4 shows the proportions male of final edited values for indicated relationships to householder for the 1980 Census and to the person in column one (again - usually the householder) for SIPP. These data do bounce around a bit but the three-wave means are pretty close to the 1980 Census proportions male by relationship. "Spouse" is the one category which varies noticeably between the Census and the three-wave SIPP mean (3.7 percent versus 8.8 percent). This is not something to be concerned about, however. For one thing, although the person in column one is usually the householder, they are not always the householder. Therefore, one would expect that there might be more women listed in column one than if it was restricted to just householders. It logically follows then that there would be more male spouses of persons in column one than male spouses of householders.

This evaluation is preliminary in nature. No statistical testing has been done and therefore this review does not necessarily meet the statistical standards required of Census Bureau publications.

EMPIRICAL RESULTS FOR EVALUATION OF RELATIONSHIP MATRIX DATA FROM WAVE 1
OF 1986 SIPP PANEL

1. Proportionate distribution of final edited values for indicated relationships to householder (1980 census) or person in column 1 (SIPP):

Relationship	1980 census	1984 wave 8	1985 wave 4	1986 wave 2
Total	100.0	100.0	100.0	100.0
Spouse	34.7	33.5	33.6	33.8
Child	54.2	53.1	52.3	52.6
Grandchild	1.9	2.4	2.3	2.3
Parent	0.9	2.1	1.9	1.5
Child-in-law	0.4	0.3	0.4	0.3
Sibling	1.4	1.3	1.2	1.3
Other relative	1.9	2.2	1.7	1.9
Nonrelative	4.2	3.7	5.0	4.4
Reported code edited out ('98')	0.0	1.3	1.3	0.9

2. Proportionate distribution of final edited values for type of parent-child relationship for June 1980 CPS and SIPP:

Type of parent-child relationship	June 1980 CPS	1984 wave 8	1985 wave 4	1986 wave 2
Total	100.0	100.0	100.0	100.0
Natural child	91.7	86.6	86.9	88.6
Stepchild	5.6	4.2	4.3	4.3
Adopted child	2.5	1.7	1.8	1.8
Foster child	0.4	0.4	0.3	0.2
Unknown	0.2	6.9	6.7	5.1

3. Proportionate distribution of final edited values for type of parent-child relationship for June 1980 CPS and SIPP, where the unknowns are distributed proportionally to the knowns:

Type of parent-child relationship	June 1980 CPS	1984 wave 8	1985 wave 4	1986 wave 2
Total	100.0	100.0	100.0	100.0
Natural child	91.9*	93.2	93.1	93.4
Stepchild	5.6	4.5	4.6	4.5
Adopted child	2.5	1.8	1.9	1.9
Foster child	0.4	0.4	0.3	0.2

4. Proportions male of final edited values for indicated relationships to householder (1980 census) or person in column 1 (SIPP):

Relationship	1980 census	1984 wave 8	1985 wave 4	1986 wave 2	Mean 84-85-86
Child	54.2	51.5	51.5	51.9	51.5
Sibling	47.4	52.3	42.3	51.5	49.0
Grandchild	52.3	53.4	48.4	54.2	52.0
Spouse	3.7	11.0	8.3	7.0	9.8
Parent	30.4	21.1	35.0	31.8	29.0
Child-in-law	51.3	52.3	49.3	49.1	50.2

Source for 1980 census data: June 1980 CPS data. 1984 wave 8 and 1985 wave 4 SIPP data is a memorandum from Donald J. Hernandez to Arthur J. Norton dated May 20, 1988.

APPENDIX A-1

Income Source Code List

Code Income Sources

- 1 - Social Security
- 2 - U.S. Government Railroad Retirement pay
- 3 - Federal Supplemental Security Income (SSI)
- 5 - State unemployment compensation
- 6 - Supplemental Unemployment Benefits
- 7 - Other unemployment compensation (Trade Adjustment Act benefits, strike pay, other)
- 8 - Veterans compensation or pensions
- 10 - Worker's compensation
- 12 - Employer or union temporary sickness policy
- 13 - Payments from a sickness, accident or disability insurance policy purchased on your own
- 20 - Aid to Families with Dependent Children (AFDC, ADC)
- 21 - General assistance or General relief
- 23 - Foster child care payments
- 24 - Other welfare
- 25 - WIC (Women, Infants and Children) Nutrition Program
- 27 - Food stamps
- 28 - Child support payments
- 29 - Alimony payments
- 30 - Pension from company or union
- 31 - Federal Civil Service or other Federal civilian employee pensions
- 32 - U.S. Military retirement pay
- 34 - State government pensions
- 35 - Local government pensions
- 36 - Income from paid-up life insurance policies or annuities
- 37 - Estates and trusts
- 38 - Other payments for retirement, disability or survivor
- 40 - G.I. Bill/VEAP education benefits
- 41 - Other VA educational assistance
- 50 - Income assistance from a charitable group
- 51 - Money from relatives or friends
- 52 - Lump sum payments
- 53 - Income from roomers or boarders
- 54 - National Guard or Reserve pay
- 55 - Incidental or casual earnings
- 56 - Other cash income not included elsewhere
- 75 - Categories combined and recoded for confidentiality reasons
 - State Administered Supplemental Security Income (old code 4)
 - Black lung payments (old code 9)
 - State temporary sickness or disability benefits (old code 11)
 - Indian, Cuban, or Refugee Assistance (old code 22)
 - National Guard or Reserve Force retirement (old code 33)

Code Asset List

- 100 - Regular/passbook savings accounts in a bank, savings and loan or credit union
- 101 - Money market deposit accounts
- 102 - Certificates of Deposit or other savings certificates
- 103 - NOW, Super NOW or other interest earning checking accounts
- 104 - Money market funds
- 105 - U.S. Government securities
- 106 - Municipal or corporate bonds
- 107 - Other interest-earning assets
- 110 - Stocks or mutual fund shares
- 120 - Rental property
- 130 - Mortgages
- 140 - Royalties
- 150 - Other financial investments

Code Special Indicators

- 170 - Worked
- 171 - Disabled
- 172 - Medicare
- 173 - Medicaid
- 174 - U.S. Saving Bonds (E, EE)
- 175 - College Work Study
- 176 - PELL Grant
- 177 - Supplemental Educational Opportunity Grant (SEOG)
- 178 - National Direct Student Loan (NSL)
- 179 - Guaranteed Student Loan
- 180 - JTPA Training
- 181 - Employer assistance
- 182 - Fellowship/Scholarship
- 183 - Other financial aid
- 200 - VA disability rating of 100%
- 201 - VA disability of less than 100%

APPENDIX A-2

Income Sources Included in Monthly Cash Income

Earnings from Employment

Wages and salaries
Nonfarm self-employment income
Farm self-employment income

Income from Assets (Property Income)

Regular/passbook savings accounts in a bank, savings and loan or credit union
Money market deposit accounts
Certificates of Deposit or other savings certificates
NOW, Super NOW or other interest-earning checking accounts
Money market funds
U.S. Government securities
Municipal or corporate bonds
Other interest-earning assets
Stocks or mutual fund shares
Rental property
Mortgages
Royalties
Other financial investments

Other Income Sources

Social Security
U.S. Government Railroad Retirement pay
Federal Supplemental Security Income (SSI)
State Administered Supplemental Security Income
State unemployment compensation
Supplemental Unemployment Benefits
Other unemployment compensation (Trade Adjustment Act benefits, strike pay, other)
Veterans compensation or pensions
Black lung payments
Worker's compensation
State temporary sickness or disability benefits
Payments from a sickness, accident or disability insurance policy purchased on your own
Aid to Families with Dependent Children (AFDC, ADC)
General Assistance or General Relief
Indian, Cuban, or Refugee Assistance
Foster child care payments
Other welfare
Child support payments
Alimony payments
Pension from company or union
Federal Civil Service or other Federal civilian employee pensions
U.S. Military retirement pay
National Guard or Reserve Forces retirement
State government pensions
Local government pensions
Income from paid-up life insurance policies or annuities
Estates and trusts

SIPP 1986 WAVE 2 RECTANGULAR

Other payments for retirement, disability or survivor benefits
G.I. Bill/VEAP education benefits
Income assistance from a charitable group
Money from relatives or friends
Lump sum payments
Income from roomers or boarders
National Guard or Reserve pay
Incidental or casual earnings
Other cash income not included elsewhere

APPENDIX A-3

Sources of Means-Tested Benefits Covered in SIPP

Cash Benefits

Federal Supplemental Security Income (SSI)
State Administered Supplemental Security Income
Veterans' pensions
Aid to Families with Dependent Children (AFDC, ADC)
General Assistance or General Relief
Indian, Cuban, or Refugee Assistance
Other welfare
Foster child care payments

Noncash Benefits

Food Stamps
Special Supplemental Food Program for Women, Infants, and Children (WIC)
Low-Income Home Energy Assistance
Medicaid
Free or reduced price school lunches
Free or reduced price school breakfasts
Public or subsidized rental housing

APPENDIX A-4

1980 Census of Population Occupation Classification System

(The numbers in parentheses refer to the 1980 Standard Occupational Classification code equivalents. Pt means part. N.e.c. means not elsewhere classified.)

MANAGERIAL AND PROFESSIONAL SPECIALTY OCCUPATIONS

1980 Code	Executive, Administrative, and Managerial Occupations
003	Legislators (111)
004	Chief executives and general administrators, public administration (112)
005	Administrators and officials, public administration (1132-1139)
006	Administrators, protective services (1131)
007	Financial managers (122)
008	Personnel and labor relations managers (123)
009	Purchasing managers (124)
013	Managers, marketing, advertising, and public relations (125)
014	Administrators, education and related fields (128)
015	Managers, medicine and health (131)
016	Managers, properties and real estate (1353)
017	Postmasters and mail superintendents (1344)
018	Funeral directors (pt 1359)
019	Managers and administrators, n.e.c. (121, 126, 127, 132-139, exc. 1344, 1353, pt 1359)
	Management related occupations
023	Accountants and auditors (1412)
024	Underwriters (1414)
025	Other financial officers (1415, 1419)
026	Management analysts (142)
027	Personnel, training, and labor relations specialists (143)
028	Purchasing agents and buyers, farm products (1443)
029	Buyers, wholesale and retail trade except farm products (1442)
033	Purchasing agents and buyers, n.e.c. (1449)
034	Business and promotion arents (145)
035	Construction inspectors (1472)
036	Inspectors and compliance officers, exc. construction (1473)
037	Management related occupations, n.e.c. (149)

Professional Specialty Occupations

Engineers, Architects, and Surveyors

043	Architects (161)
	Engineers
044	Aerospace (1622)
045	Metallurgical and materials (1623)
046	Mining (1624)
047	Petroleum (1625)
048	Chemical (1626)
049	Nuclear (1627)
053	Civil (1628)
054	Agricultural (1632)
055	Electrical and electronic (1633, 1636)
056	Industrial (1634)
057	Mechanical (1635)

058	Marine and naval architects (1637)
059	Engineers, n.e.c. (1639)
063	Surveyors and mapping scientists (164)
	Mathematical and Computer Scientists
064	Computer systems analysts and scientists (171)
065	Operations and systems researchers and analysts (172)
066	Actuaries (1732)
067	Statisticians (1733)
068	Mathematical scientists, n.e.c. (1739)
	Natural Scientists
069	Physicists and astronomers (1842, 1843)
073	Chemists, except biochemists (1845)
074	Atmospheric and space scientists (1846)
075	Geologists and geodesists (1847)
076	Physical scientists, n.e.c. (1849)
077	Agricultural and food scientists (1853)
078	Biological and life scientists (1854)
079	Forestry and conservation scientists (1852)
083	Medical scientists (1855)
	Health Diagnosing Occupations
084	Physicians (261)
085	Dentists (262)
086	Veterinarians (27)
087	Optometrists (281)
088	Podiatrists (283)
089	Health diagnosing practitioners, n.e.c. (289)
	Health Assessment and Treating Occupations
095	Registered nurses (29)
096	Pharmacists (301)
097	Dietitians (302)
	Therapists
098	Inhalation therapists (3031)
099	Occupational therapists (3032)
103	Physical therapists (3033)
104	Speech therapists (3034)
105	Therapists, n.e.c. (3039)
106	Physicians' assistants (304)
	Teachers, Postsecondary
113	Earth, environmental, and marine science teachers (2212)
114	Biological science teachers (2213)
115	Chemistry teachers (2214)
116	Physics teachers (2215)
117	Natural science teachers, n.e.c. (2216)
118	Psychology teachers (2217)
119	Economics teachers (2218)
123	History teachers (2222)
124	Political science teachers (2223)
125	Sociology teachers (2224)
126	Social science teachers, n.e.c. (2225)
127	Engineering teachers (2226)
128	Mathematical science teachers (2227)
129	Computer science teachers (2228)
133	Medical science teachers (2231)
134	Health specialties teachers (2232)
135	Business, commerce, and marketing teachers (2233)
136	Agriculture and forestry teachers (2234)

137	Art, drama, and music teachers (2235)
138	Physical education teachers (2236)
139	Education teachers (2237)
143	English teachers (2238)
144	Foreign language teachers (2242)
145	Law teachers (2243)

185	Designers (322)
186	Musicians and composers (323)
187	Actors and directors (324)
188	Painters, sculptors, craft-artists, and artist printmakers (325)
189	Photographers (326)
193	Dancers (327)
194	Artists, performers, and related workers, n.e.c. (328, 329)
195	Editors and reporters (331)
197	Public relations specialists (332)
198	Announcers (333)
199	Athletes (34)

TECHNICAL, SALES, AND ADMINISTRATIVE SUPPORT OCCUPATIONS

Technicians and Related Support Occupations

	Health Technologists and Technicians
203	Clinical laboratory technologists and technicians (362)
204	Dental hygienists (363)
205	Health record technologists and technicians (364)
206	Radiologic technicians (365)
207	Licensed practical nurses (366)
208	Health technologists and technicians, n.e.c. (369)
	Technologists and Technicians, Except Health
	Engineering and Related Technologists and Technicians
213	Electrical and electronic technicians (3711)
214	Industrial engineering technicians (3712)
215	Mechanical engineering technicians (3713)
216	Engineering technicians, n.e.c. (3719)
217	Drafting occupations (372)
218	Surveying and mapping technicians (373)
	Science Technicians
223	Biological technicians (382)
224	Chemical technicians (3831)
225	Science technicians, n.e.c. (3832, 3833, 384, 389)
	Technicians; Except Health, Engineering, and Science
226	Airplane pilots and navigators (825)
227	Air traffic controllers (392)
228	Broadcast equipment operators (393)
229	Computer programmers (3971, 3972)
233	Tool programmers, numerical control (3974)
234	Legal assistants (396)
235	Technicians, n.e.c. (399)

Sales Occupations

243	Supervisors and proprietors, sales occupations (40)
	Sales Representatives, Finance and Business Services
253	Insurance sales occupations (4122)
254	Real estate sales occupations (4123)
255	Securities and financial services sales occupations (4124)
256	Advertising and related sales occupations (4153)
257	Sales occupations, other business services (4152)
	Sales Representatives, Commodities Except Retail
258	Sales engineers (421)
259	Sales representatives, mining, manufacturing, and wholesale (423, 424)
	Sales Workers, Retail and Personal Services
263	Sales workers, motor vehicles and boats (4342, 4344)
264	Sales workers, apparel (4346)
265	Sales workers, shoes (4351)
266	Sales workers, furniture and home furnishings (4348)
267	Sales workers; radio, TV, hi-fi, and appliances (4343, 4352)
268	Sales workers, hardware and building supplies (4353)
269	Sales workers, parts (4367)
274	Sales workers, other commodities (4345, 4347, 4354, 4356, 4359, 4362, 4369)
275	Sales counter clerks (4363)
Q(276)	Cashiers (4364)
277	Street and door-to-door sales workers (4366)

- 278 News vendors (4365)
- Sales Related Occupations
- 283 Demonstrators, promoters and models, sales (445)
- 284 Auctioneers (447)
- 285 Sales support occupations, n.e.c. (444, 446, 449)

Administrative Support Occupations, Including Clerical

- Supervisors, Administrative Support Occupations
- 303 Supervisors, general office (4511, 4513, 4514, 4516, 4519, 4529)
- 304 Supervisors, computer equipment operators (4512)
- 305 Supervisors, financial records processing (4521)
- 306 Chief communications operators (4523)
- 307 Supervisors; distribution, scheduling, and adjusting clerks (4522, 4524-4528)
- Computer Equipment Operators
- 308 Computer operators (4612)
- 309 Peripheral equipment operators (4613)
- Secretaries, Stenographers, and Typists
- R(313) Secretaries (4622)
- 314 Stenographers (4623)
- 315 Typists (4624)
- Information Clerks
- 316 Interviewers (4642)
- 317 Hotel clerks (4643)
- 318 Transportation ticket and reservation agents (4644)
- 319 Receptionists (4645)
- 323 Information clerks, n.e.c. (4649)
- Records Processing Occupations, Except Financial
- 325 Classified-ad clerks (4662)
- 326 Correspondence clerks (4663)
- 327 Order clerks (4664)
- 328 Personnel clerks, except payroll and timekeeping (4692)
- 329 Library clerks (4694)
- 335 File clerks (4696)
- 336 Records clerks (4699)
- Financial Records Processing Occupations
- S(337) Bookkeepers, accounting, and auditing clerks (4712)
- 338 Payroll and timekeeping clerks (4713)
- 339 Billing clerks (4715)
- 343 Cost and rate clerks (4716)
- 344 Billing, posting, and calculating machine operators (4718)
- Duplicating, Mail and Other Office Machine Operators
- 345 Duplicating machine operators (4722)
- 346 Mail preparing and paper handling machine operators (4723)
- 347 Office machine operators, n.e.c. (4729)
- Communications Equipment Operators
- 348 Telephone operators (4732)
- 349 Telegraphers (4733)
- 353 Communications equipment operators, n.e.c. (4739)
- Mail and Message Distributing Occupations
- 354 Postal clerks, exc. mail carriers (4742)
- 355 Mail carriers, postal service (4743)
- 356 Mail clerks, exc. postal service (4744)
- 357 Messengers (4745)
- Material Recording, Scheduling, and Distributing Clerks
- 359 Dispatchers (4751)

363	Production coordinators (4752)
364	Traffic, shipping, and receiving clerks (4753)
365	Stock and inventory clerks (4754)
366	Meter readers (4755)
368	Weighers, measurers, and checkers (4756)
369	Samplers (4757)
373	Expeditors (4758)
374	Material recording, scheduling, and distributing clerks, n.e.c. (4759)
	Adjusters and Investigators
375	Insurance adjusters, examiners, and investigators (4782)
376	Investigators and adjusters, except insurance (4783)
377	Eligibility clerks, social welfare (4784)
378	Bill and account collectors (4786)
	Miscellaneous Administrative Support Occupations
379	General office clerks (463)
383	Bank tellers (4791)
384	Proofreaders (4792)
385	Data-entry keyers (4793)
386	Statistical clerks (4794)
387	Teachers' aides (4795)
389	Administrative support occupations, n.e.c. (4787, 4799)

SERVICE OCCUPATIONS

Private Household Occupations

403	Launderers and ironers (503)
404	Cooks, private household (504)
405	Housekeepers and butlers (505)
406	Child care workers, private household (506)
T(407)	Private household cleaners and servants (502, 507, 509)

Protective Service Occupations

	Supervisors, Protective Service Occupations
413	Supervisors, firefighting and fire prevention occupations (5111)
414	Supervisors, police and detectives (5112)
415	Supervisors, guards (5113)
	Firefighting and Fire Prevention Occupations
416	Fire inspection and fire prevention occupations (5122)
417	Firefighting occupations (5123)
	Police and Detectives
418	Police and detectives, public service (5132)
423	Sheriffs bailiffs, and other law enforcement officers (5134)
424	Correctional institution officers (5133)
	Guards
425	Crossing guards (5142)
426	Guards and police, exc. public service (5144)
427	Protective service occupations, n.e.c. (5149)

Service Occupations, Except Protective and Household

	Food Preparation and Service Occupations
433	Supervisors, food preparation and service occupations (5211)
434	Bartenders (5212)
U(435)	Waiters and waitresses (5213)

436	Cooks, except short order (5214)
437	Short-order cooks (5215)
438	Food counter, fountain and related occupations (5216)
439	Kitchen workers, food preparation (5217)
443	Waiters' /waitresses' assistants (5218)
444	Miscellaneous food preparation occupations (5219)
	Health Service Occupations
445	Dental assistants (5232)
446	Health aides, except nursing (5233)
447	Nursing aides, orderlies, and attendants (5236)
	Cleaning and Building Service Occupations, except Household
448	Supervisors, cleaning and building service workers (5241)
449	Maids and housemen (5242, 5249)
V(453)	Janitors and cleaners (5244)
454	Elevator operators (5245)
455	Pest control occupations (5246)
	Personal Service Occupations
456	Supervisors, personal service occupations (5251)
457	Barbers (5252)
458	Hairdressers and cosmetologists (5253)
459	Attendants, amusement and recreation facilities (5254)
463	Guides (5255)
464	Ushers (5256)
465	Public transportation attendants (5257)
466	Baggage porters and bellhops (5262)
467	Welfare service aides (5263)
468	Child care workers,except private household (5264)
469	Personal service occupations, n.e.c. (5258, 5269)

FARMING, FORESTRY, AND FISHING OCCUPATIONS

Farm Operators and Managers

W(473)	Farmers, except horticultural (5512-5514)
474	Horticultural specialty farmers (5515)
475	Managers, farms, except horticultural (5522-5524)
476	Managers, horticultural specialty farms (5525)

Other Agricultural and Related Occupations

	Farm Occupations, Except Managerial
477	Supervisors, farm workers (5611)
479	Farm workers (5612-5617)
483	Marine life cultivation workers (5618)
484	Nursery workers (5619)
	Related Agricultural Occupations
485	Supervisors, related agricultural occupations (5621)
486	Groundskeepers and gardeners, except farm (5622)
487	Animal caretakers, except farm (5624)
488	Graders and sorters, agricultural products (5625)
489	Inspectors, agricultural products (5627)

Forestry and Logging Occupations

- 494 Supervisors, forestry, and logging workers (571)
- 495 Forestry workers, except logging (572)
- 496 Timber cutting and logging occupations (573, 579)

Fishers, Hunters, and Trappers

- 497 Captains and other officers, fishing vessels (pt 8241)
- 498 Fishers (583)
- 499 Hunters and trappers (584)

PRECISION PRODUCTION, CRAFT, AND REPAIR OCCUPATIONS

Mechanics and Repairers

- 503 Supervisors, mechanics and repairers (60)
- Mechanics and Repairers, Except Supervisors
 - Vehicle and Mobile Equipment Mechanics and Repairers
 - X(505) Automobile mechanics (pt 6111)
 - 506 Automobile mechanic apprentices (pt 6111)
 - 507 Bus, truck, and stationary engine mechanics (6112)
 - 508 Aircraft engine mechanics (6113)
 - 509 Small engine repairers (6114)
 - 514 Automobile body and related repairers (6115)
 - 515 Aircraft mechanics, exc. engine (6116)
 - 516 Heavy equipment mechanics (6117)
 - 517 Farm equipment mechanics (6118)
 - 518 Industrial machinery repairers (613)
 - 519 Machinery maintenance occupations (614)
 - Electrical and Electronic Equipment Repairers
 - 523 Electronic repairers, communications and industrial equipment (6151, 6153, 6155)
 - 525 Data processing equipment repairers (6154)
 - 526 Household appliance and power tool repairers (6156)
 - 527 Telephone line installers and repairers (6157)
 - 529 Telephone installers and repairers (6158)
 - 533 Miscellaneous electrical and electronic equipment repairers (6152, 6159)
 - 534 Heating, air conditioning, and refrigeration mechanics (6161)
 - Miscellaneous Mechanics and Repairers
 - 535 Camera, watch, and musical instrument repairers (6171, 6172)
 - 536 Locksmiths and safe repairers (6173)
 - 538 Office machine repairers (6174)
 - 539 Mechanical controls and valve repairers (6175)
 - 543 Elevator installers and repairers (6176)
 - 544 Millwrights (6178)
 - 547 Specified mechanics and repairers, n.e.c. (6177, 6179)
 - 549 Not specified mechanics and repairers

Construction Trades

- Supervisors, construction occupations
- 553 Supervisors; brickmasons, stonemasons, and tile setters (6312)
- 554 Supervisors, carpenters and related workers (6313)
- 555 Supervisors, electricians and power transmission installers (6314)
- 556 Supervisors; painters, paperhangers, and plasterers (6315)
- 557 Supervisors; plumbers, pipefitters, and steamfitters (6316)

558	Supervisors, n.e.c. (6311, 6318)
	Construction Trades, Except Supervisors
563	Brickmasons and stonemasons (pt 6412, pt 6413)
564	Brickmason and stonemason apprentices (pt 6412, pt 6413)
565	Tile setters, hard and soft (6414, pt 6462)
566	Carpet installers (pt 6462)
Y(567)	Carpenters (pt 6422)
569	Carpenter apprentices (pt 6422)
573	Drywall installers (6424)
575	Electricians (pt 6432)
576	Electrician apprentices (pt 6432)
577	Electrical power installers and repairers (6433)
579	Painters, construction and maintenance (6442)
583	Paperhangers (6443)
584	Plasterers (6444)
585	Plumbers, pipefitters, and steamfitters (pt 645)
587	Plumber, pipefitter, and steamfitter apprentices (pt 645)
588	Concrete and terrazzo finishers (6463)
589	Glaziers (6464)
593	Insulation workers (6465)
594	Paving, surfacing, and tamping equipment operators (6466)
595	Roofers (6468)
596	Sheetmetal duct installers (6472)
597	Structural metal workers (6473)
598	Drillers, earth (6474)
599	Construction trades, n.e.c. (6467, 6475, 6476, 6479)
	Extractive Occupations
613	Supervisors, extractive occupations (632)
614	Drillers, oil well (652)
615	Explosives workers (653)
616	Mining machine operators (654)
617	Mining occupations, n.e.c. (656)
	Precision Production Occupations
633	Supervisors, production occupations (67, 71)
	Precision Metal Working Occupations
634	Tool and die makers (pt 6811)
635	Tool and die maker apprentices (pt 6811)
636	Precision assemblers, metal (6812)
637	Machinists (pt 6813)
639	Machinist apprentices (pt 6813)
643	Boilermakers (6814)
644	Precision grinders, filers, and tool sharpeners (6816)
645	Patternmakers and model makers, metal (6817)
646	Lay-out workers (6821)
647	Precious stones and metals workers (Jewelers) (6822, 6866)
649	Engravers, metal (6823)
653	Sheet metal workers (pt 6824)
654	Sheet metal worker apprentices (pt 6824)
655	Miscellaneous precision metal workers (6829)
	Precision Woodworking Occupations
656	Patternmakers and model makers, wood (6831)
657	Cabinet makers and bench carpenters (6832)
658	Furniture and wood finishers (6835)
659	Miscellaneous precision woodworkers (6839)
	Precision Textile, Apparel, and Furnishings Machine Workers
666	Dressmakers (pt 6852, pt 7752)

667	Tailors (pt 6852)
668	Upholsterers (6853)
669	Shoe repairers (6854)
673	Apparel and fabric patternmakers (6856)
674	Miscellaneous precision apparel and fabric workers (6859, pt 7752)
	Precision Workers, Assorted Materials
675	Hand molders and shapers, except jewelers (6861)
676	Patternmakers, lay-out workers, and cutters (6862)
677	Optical goods workers (6864, pt 7477, pt 7677)
678	Dental laboratory and medical appliance technicians (6865)
679	Bookbinders (6844)
683	Electrical and electronic equipment assemblers (6867)
684	Miscellaneous precision workers, n.e.c. (6869)
	Precision Food Production Occupations
686	Butchers and meat cutters (6871)
687	Bakers (6872)
688	Food batchmakers (6873, 6879)
	Precision Inspectors, Testers, and Related Workers
689	Inspectors, testers, and graders (6881, 828)
693	Adjusters and calibrators (6882)
	Plant and System Operators
694	Water and sewage treatment plant operators (691)
695	Power plant operators (pt 693)
696	Stationary engineers (pt 693, 7668)
699	Miscellaneous plant and system operators (692, 694, 695, 696)

OPERATORS, FABRICATORS, AND LABORERS

Machine Operators, Assemblers, and Inspectors

Machine Operators and Tenders, except Precision

	Metal working and Plastic Working Machine Operators
703	Lathe and turning machine set-up operators (7312)
704	Lathe and turning machine operators (7512)
705	Milling and planing machine operators (7313, 7513)
706	Punching and stamping press machine operators (7314, 7317, 7514, 7517)
707	Rolling machine operators (7316, 7516)
708	Drilling and boring machine operators (7318, 7518)
709	Grinding, abrading, buffing, and polishing machine operators (7322, 7324, 7522)
713	Forging machine operators (7319, 7519)
714	Numerical control machine operators (7326)
715	Miscellaneous metal, plastic, stone, and glass working machine operators (7329, 7529)
717	Fabricating machine operators, n.e.c. (7339, 7539)
	Metal and Plastic Processing Machine Operators
719	Molding and casting machine operators (7315, 7342, 7515, 7542)
723	Metal plating machine operators (7343, 7543)
724	Heat treating equipment operators (7344, 7544)
725	Miscellaneous metal and plastic processing machine operators (7349, 7549)
	Woodworking Machine Operators
726	Wood lathe, routing, and planing machine operators (7431, 7432, 7631, 7632)
727	Sawing machine operators (7433, 7633)
728	Shaping and joining machine operators (7435, 7635)
729	Nailing and tacking machine operators (7636)
733	Miscellaneous woodworking machine operators (7434, 7439, 7634, 7639)

Printing Machine Operators

- 734 Printing machine operators (7443, 7643)
- 735 Photoengravers and lithographers (6842, 7444, 7644)
- 736 Typesetters and compositors (6841, 7642)
- 737 Miscellaneous printing machine operators (6849, 7449, 7649)

Textile, Apparel, and Furnishings Machine Operators

- 738 Winding and twisting machine operators (7451, 7651)
- 739 Knitting, looping, taping, and weaving machine operators (7452, 7652)
- 743 Textile cutting machine operators (7654)
- 744 Textile sewing machine operators (7655)
- 745 Shoe machine operators (7656)
- 747 Pressing machine operators (7657)
- 748 Laundering and dry cleaning machine operators (6855, 7658)
- 749 Miscellaneous textile machine operators (7459, 7659)

Machine Operators, Assorted Materials

- 753 Cementing and gluing machine operators (7661)
- 754 Packaging and filling machine operators (7462, 7662)
- 755 Extruding and forming machine operators (7463, 7663)
- 756 Mixing and blending machine operators (7664)
- 757 Separating, filtering, and clarifying machine operators (7476, 7666, 7676)
- 758 Compressing and compacting machine operators (7467, 7667)
- 759 Painting and paint spraying machine operators (7669)
- 763 Roasting and baking machine operators, food (7472, 7672)
- 764 Washing, cleaning, and picking machine operators (7673)
- 765 Folding machine operators (7474, 7674)
- 766 Furnace, kiln, and oven operators, exc. food (7675)
- 768 Crushing and grinding machine operators (pt 7477, pt 7677)
- 769 Slicing and cutting machine operators (7478, 7678)
- 773 Motion picture projectionists (pt 7479)
- 774 Photographic process machine operators (6863, 6868, 7671)
- 777 Miscellaneous machine operators, n.e.c. (pt 7479, 7665, 7679)
- 779 Machine operators, not specified

Fabricators, Assemblers, and Hand Working Occupations

- 783 Welders and cutters (7332, 7532, 7714)
- 784 Solderers and brazers (7333, 7533, 7717)
- 785 Assemblers (772, 774)
- 786 Hand cutting and trimming occupations (7753)
- 787 Hand molding, casting, and forming occupations (7754, 7755)
- 789 Hand painting, coating, and decorating occupations (7756)
- 793 Hand engraving and printing occupations (7757)
- 794 Hand grinding and polishing occupations (7758)
- 795 Miscellaneous hand working occupations (7759)

Production Inspectors, Testers, Samplers, and Weighers

- 796 Production inspectors, checkers, and examiners (782, 787)
- 797 Production testers (783)
- 798 Production samplers and weighers (784)
- 799 Graders and sorters, exc. agricultural (785)

Transportation and Material Moving Occupations**Motor Vehicle Operators**

- 803 Supervisors, motor vehicle operators (8111)
- 804) Truck drivers, heavy (8212, 8213)
- 805 Truck drivers, light (8214)
- 806 Driver-sales workers (8218)
- 808 Bus drivers (8215)

809	Taxicab drivers and chauffeurs (8216)
813	Parking lot attendants (874)
814	Motor transportation occupations, n.e.c. (8219)
	Transportation Occupations, Except Motor Vehicles
	Rail Transportation Occupations
823	Railroad conductors and yardmasters (8113)
824	Locomotive operating occupations (8232)
825	Railroad brake, signal, and switch operators (8233)
826	Rail vehicle operators, n.e.c. (8239)
	Water Transportation Occupations
828	Ship captains and mates, except fishing boats (pt 8241, 8242)
829	Sailors and deckhands (8243)
833	Marine engineers (8244)
834	Bridge, lock, and lighthouse tenders (8245)
	Material Moving Equipment Operators
843	Supervisors, material moving equipment operators (812)
844	Operating engineers (8312)
845	Longshore equipment operators (8313)
848	Hoist and winch operators (8314)
849	Crane and tower operators (8315)
853	Excavating and loading machine operators (8316)
855	Grader, dozer, and scraper operators (8317)
856	Industrial truck and tractor equipment operators (8318)
859	Miscellaneous material moving equipment operators (8319)

Handlers, Equipment Cleaners, Helpers, and Laborers

863	Supervisors, handlers, equipment cleaners, and laborers, n.e.c. (85)
864	Helpers, mechanics and repairers (863)
	Helpers, Construction and Extractive Occupations
865	Helpers, construction trades (8641-8645, 8648)
866	Helpers, surveyor (8646)
867	Helpers, extractive occupations (865)
869	Construction laborers (871)
873	Production helpers (861, 862)
	Freight, Stock, and Material Handlers
875	Garbage collectors (8722)
876	Stevedores (8723)
877	Stock handlers and baggers (8724)
878	Machine feeders and offbearers (8725)
883	Freight, stock, and material handlers, n.e.c. (8726)
885	Garage and service station related occupations (873)
887	Vehicle washers and equipment cleaners (875)
888	Hand packers and packagers (8761)
889	Laborers, except construction (8769)
905	Member of the Armed Forces

APPENDIX A-5

1980 Census of Population Industry Classification System

(Alphabets parentheses are the 1972 SIC code equivalents ¹⁾)

Census

Code

AGRICULTURE, FORESTRY, AND FISHERIES

- 010 (A) Agricultural production, crops (01)
- 011 Agricultural production, livestock (02)
- 020 Agricultural services, except horticultural (07, except 078)
- 021 Horticultural services (078)
- 030 Forestry (08)
- 031 Fishing, hunting, and trapping (09)

MINING

- 040 Metal mining (10)
- 041 Coal mining (11, 12)
- 042 Crude petroleum and natural gas extraction (13)
- 050 Nonmetallic mining and quarrying, except fuel (14)

- 060 (B) CONSTRUCTION (15, 16, 17)

MANUFACTURING

Nondurable Goods

Food and kindred products

- 100 Meat products (201)
- 101 Dairy products (202)
- 102 Canned and preserved fruits and vegetables (203)
- 110 Grain mill products (204)
- 111 Bakery products (205)
- 112 Sugar and confectionery products (206)
- 120 Beverage industries (208)
- 121 Miscellaneous food preparations and kindred products (207, 209)
- 122 Not specified food industries
- 130 Tobacco manufactures (21)

Textile mill products

- 132 Knitting mills (225)
- 140 Dyeing and finishing textiles, except wool and knit goods (226)
- 141 Floor coverings, except hard surface (227)
- 142 Yarn, thread, and fabric mills (221-224, 228)
- 150 Miscellaneous textile mill products (229)

¹ See Executive Office of the President, Office of Management and Budget, Standard Industrial Classification Manual, 1972 and the 1977 Supplement.

SIPP 1986 WAVE 2 RECTANGULAR

- Apparel and other finished textile products
- 151 Apparel and accessories, except knit (231-238)
- 152 Miscellaneous fabricated textile products (239)
- Paper and allied products
- 160 Pulp, paper, and paperboard mills (261-263, 266)
- 161 Miscellaneous paper and pulp products (264)
- 162 Paperboard containers and boxes (265)
- Printing, publishing, and allied industries
- 171 (C) Newspaper publishing and printing (271)
- 172 Printing, publishing, and allied industries, except newspapers (272-279)
- Chemicals and allied products
- 180 Plastics, synthetics, and resins (282)
- 181 Drugs (283)
- 182 Soaps and cosmetics (284)
- 190 Paints, varnishes, and related products (287)
- 191 Agricultural chemicals (287)
- 192 Industrial and miscellaneous chemicals (281, 286, 289)
- Petroleum and coal products
- 200 Petroleum refining (291)
- 201 Miscellaneous petroleum and coal products (295, 299)
- Rubber and miscellaneous plastics products
- 210 Tires and inner tubes (301)
- 211 Other rubber products, and plastics footwear and belting (302-304, 306)
- 212 Miscellaneous plastics products (307)
- Leather and leather products
- 220 Leather tanning and finishing (311)
- 221 Footwear, except rubber and plastic (313, 314)
- 222 Leather products, except footwear (315-317, 319)

Durable Goods

- Lumber and wood products, except furniture
- 230 Logging (241)
- 231 Sawmills, planing mills, and millwork (242, 243)
- 232 Wood buildings and mobile homes (245)
- 241 Miscellaneous wood products (244, 249)
- 242 Furniture and fixtures (25)
- Stone, clay, glass, and concrete products
- 250 Glass and glass products (321-323)
- 251 Cement, concrete, gypsum, and plaster products (324, 327)
- 252 Structural clay products (325)
- 261 Pottery and related products (326)
- 262 Miscellaneous nonmetallic mineral and stone products (328, 329).
- Metal industries
- 270 Blast furnaces, steelworks, rolling and finishing mills (331)
- 271 Iron and steel foundries (332)
- 272 Primary aluminum industries (3334, part 334, 3353-3355, 3361)
- 280 Other primary metal industries (3331-3333, 3339, part 334, 3351, 3356, 3357, 3362, 3369, 339)
- 281 Cutlery, handtools, and other hardware (342)
- 282 Fabricated structural metal products (344)
- 290 Screw machine products (345)
- 291 Metal forgings and stampings (346)
- 292 Ordnance (348)

APPENDIX A-5 - INDUSTRY CLASSIFICATION SYSTEM

300	Miscellaneous fabricated metal products (341, 343, 347, 349)
301	Not specified metal industries
	Machinery, except electrical
310	Engines and turbines (351)
311	Farm machinery and equipment (352)
312	Construction and material handling machines (353)
320	Metalworking machinery (354)
321	Office and accounting machines (357, except 3573)
322	Electronic computing equipment (3573)
331	Machinery, except electrical, n.e.c. (355, 356, 358, 359)
332	Not specified machinery
	Electrical machinery, equipment, and supplies
340	Household appliances (363)
341	Radio, T.V., and communication equipment (365, 366)
342	Electrical machinery, equipment, and supplies, n.e.c. (361, 362, 364, 367, 369)
350	Not specified electrical machinery, equipment, and supplies
	Transportation equipment
351	Motor vehicles and motor vehicle equipment (371)
352	Aircraft and parts (372)
360	Ship and boat building and repairing (373)
361	Railroad locomotives and equipment (374)
362	Guided missiles, space vehicles, and parts (376)
370	Cycles and miscellaneous transportation equipment (375, 379)
	Professional and photographic equipment, and watches
371	Scientific and controlling instruments (381, 382)
372	Optical and health services supplies (383, 384, 385)
380	Photographic equipment and supplies (386)
381	Watches, clocks, and clockwork operated devices (387)
382	Not specified professional equipment
390	Toys, amusement, and sporting goods (394)
391	Miscellaneous manufacturing industries (39 exc. 394)
392	Not specified manufacturing industries

**TRANSPORTATION, COMMUNICATIONS, AND OTHER
PUBLIC UTILITIES**

	Transportation
400	Railroads (40)
401	Bus service and urban transit (41, except 412)
402	Taxicab service (412)
410	Trucking service (421, 423)
411	Warehousing and storage (422)
412	U.S. Postal Service (43)
420	Water transportation (44)
421	Air transportation (45)
422	Pipe lines, except natural gas (46)
432	Services incidental to transportation (47)
	Communications
440	Radio and television broadcasting (483)
441	Telephone (wire and radio) (481)
442	Telegraph and miscellaneous communication services (482, 489)
	Utilities and sanitary services
460	Electric light and power (491)

SIPP 1986 WAVE 2 RECTANGULAR

461	Gas and steam supply systems (492, 496)
462	Electric and gas, and other combinations (493)
470	Water supply and irrigation (494, 497)
471	Sanitary services (495)
472	Not specified utilities

WHOLESALE TRADE

Durable Goods

500	Motor vehicles and equipment (501)
501	Furniture and home furnishings (502)
502	Lumber and construction materials (503)
510	Sporting goods, toys, and hobby goods (504)
511	Metals and minerals, except petroleum (505)
512	Electrical goods (506)
521	Hardware, plumbing and heating supplies (507)
522	Not specified electrical and hardware products
530	Machinery, equipment, and supplies (508)
531	Scrap and waste materials (5093)
532	Miscellaneous wholesale, durable goods (5094, 5099)

Nondurable Goods

540	Paper and paper products (511)
541	Drugs, chemicals and allied products (512, 516)
542	Apparel, fabrics, and notions (513)
550	Groceries and related products (514)
551	Farm products - raw materials (515)
552	Petroleum products (517)
560	Alcoholic beverages (518)
561	Farm supplies (5191)
562	Miscellaneous wholesale, nondurable goods (5194, 5198, 5199)
571	Not specified wholesale trade

RETAIL TRADE

580	Lumber and building material retailing (521, 523)
581	Hardware stores (525)
582	Retail nurseries and garden stores (526)
590	Mobile home dealers (527)
591 (D)	Department stores (531)
592	Variety stores (533)
600	Miscellaneous general merchandise stores (539)
601 (E)	Grocery stores (541)
602	Dairy products stores (545)
610	Retail bakeries (546)
611	Food stores, n.e.c. (542, 543, 544, 549)
612	Motor vehicle dealers (551, 552)
620	Auto and home supply stores (553)
621	Gasoline service stations (554)
622	Miscellaneous vehicle dealers (555, 556, 557, 559)
630	Apparel and accessory stores, except shoe (56, except 566)
631	Shoe stores (566)

632	Furniture and home furnishings stores (571)
640	Household appliances, TV, and radio stores (572, 573)
641 (F)	Eating and drinking places (58)
642	Drug stores (591)
650	Liquor stores (592)
651	Sporting goods, bicycles, and hobby stores (5941, 5945, 5946)
652	Book and stationery stores (5942, 5943)
660	Jewelry stores (5944)
661	Sewing, needlework and piece goods stores (5949)
662	Mail order houses (5961)
670	Vending machine operators (5962)
671	Direct selling establishments ¹ establishments (5963)
672	Fuel and ice dealers (598)
681	Retail florists (5992)
682	Miscellaneous retail stores (593, 5947, 5948, 5993, 5994, 5999)
691	Not specified retail trade

FINANCE, INSURANCE, AND REAL ESTATE

700 (G)	Banking (60)
701	Savings and loan associations (612)
702	Credit agencies, n.e.c. (61, except 612)
710	Security, commodity brokerage, and investment companies (62, 67)
711 (H)	Insurance (63, 64)
712	Real estate, including real estate-insurance-law offices (65, 66)

BUSINESS AND REPAIR SERVICES

721	Advertising (731)
722	Services to dwellings and other buildings (734)
730	Commercial research, development, and testing labs (7391, 7397)
731	Personnel supply services (736)
732	Business management and consulting services (7392)
740	Computer and data processing services (737)
741	Detective and protective services (7393)
742	Business services, n.e.c. (732, 733, 735, 7394, 7395, 7396, 7399)
750	Automotive services, except repair (751, 752, 754)
751	Automotive repair shops (753)
752	Electrical repair shops (762, 7694)
760	Miscellaneous repair services (763, 764, 7692, 7699)

PERSONAL SERVICES

761 (J)	Private households (88)
762	Hotels and motels (701)
770	Lodging places, except hotels and motels (702, 703, 704)
771	Laundry, cleaning, and garment services (721)
772	Beauty shops (723)
780	Barber shops (724)
781	Funeral service and crematories (726)
782	Shoe repair shops (725)
790	Dressmaking shops (part 729)

SIPP 1986 WAVE 2 RECTANGULAR

791 Miscellaneous personal services (722, part 729)

ENTERTAINMENT AND RECREATION SERVICES

800 Theaters and motion pictures (78, 792)

801 Bowling alleys, billiard and pool parlors (793)

802 Miscellaneous entertainment and recreation services (791, 794, 799)

PROFESSIONAL AND RELATED SERVICES

812 Offices of physicians (801, 803)

820 Offices of dentists (802)

821 Offices of chiropractors (8041)

822 Offices of optometrists (8042)

830 Offices of health practitioners, n.e.c. (8049)

831 (K) Hospitals (806)

832 Nursing and personal care facilities (805)

840 Health services, n.e.c. (807, 808, 809)

841 Legal services (81)

842 (L) Elementary and secondary schools (821)

850 (M) Colleges and universities (822)

851 Business, trade, and vocational schools (824)

852 Libraries (823)

860 Educational services, n.e.c. (829)

861 Job training and vocational rehabilitation services (833)

862 Child day care services (835)

870 Residential care facilities, without nursing (836)

871 Social services, n.e.c. (832, 839)

872 Museums, art galleries, and zoos (84)

880 Religious organizations (866)

881 Membership organizations (861-865, 869)

882 Engineering, architectural, and surveying services (891)

890 Accounting, auditing, and bookkeeping services (893)

891 Noncommercial educational and scientific research (892)

892 Miscellaneous professional and related services (899)

PUBLIC ADMINISTRATION

900 Executive and legislative offices (911-913)

901 General government, n.e.c. (919)

910 Justice, public order, and safety (92)

921 Public finance, taxation, and monetary policy (93)

922 Administration of human resources programs (94)

930 Administration of environmental quality and housing programs (95)

931 Administration of economic programs (96)

932 National security and international affairs (97)

991 Member of the Armed Forces

15. Was ... living alone?
0922 1 ☐ Yes — SKIP to Section 1, item 1 x1 ☐ DK } SKIP to
2 ☐ No x2 ☐ Ref. } item 18

INTRODUCTION
INTERVIEWER INSTRUCTIONS — Read introduction once to each respondent. Do not repeat to another respondent who was in the room when you earlier read the introduction.
(As I described during my last visit.) This survey is about the economic situation of people living in the United States. Most of the questions will be about ...'s activities during _____, and _____.
Here is a calendar that shows the 4 months we will be talking about. (Hand respondent Flashcard J.) [This time period is very important, so if you have any questions about what period is being referred to during the interview, please ask me.]
[We need the most accurate and complete information possible. Please think carefully about each question, search your memory and take your time in answering.] For some of the questions it will help to look up the answers by checking whatever records are available to you here. **GO TO CHECK ITEM N1.**]

16. How many of the people ... was living with were ...'s relatives?
0924 _____ Enter number of persons
x1 ☐ DK } SKIP to
x3 ☐ None — SKIP to item 18 x2 ☐ Ref. } item 18

17. How many of these relatives are now living here?

CHECK ITEM T14

Is ... 18 to 64 years old?

8200

1 ☐ Yes

2 ☐ No -- SKIP to Check Item T21, page 52

STATEMENT A

Now I would like to ask some questions about some of the jobs ... has held.

CHECK ITEM T15

Is there an employer or business listed in cc item 42 or 43?

8202

1 ☐ Yes

2 ☐ No -- SKIP to Check Item T17

ASK OR VERIFY --

1. What was the name of ...'s MAIN employer or business during the period (8 months ago) through (5 months ago)?

(If more than one, enter name of latest employer)

PGM 8

Name of employer or business

8204

CHECK ITEM T16

Refer to cc item 42 or 43.

What is the ID number of this employer or business?

PGM 7

8206

☐ Employer number

OR

8208

☐ Business number

} SKIP to 3

CHECK ITEM T17

Is "Worked" (code 170) marked on the ISS?

E210

1 ☐ Yes

2 ☐ No -- SKIP to 4a

ASK OR VERIFY --

2. What was the name of ...'s MAIN employer or business during the past 4 months?

PGM 8

Name of employer or business

8212

CHECK ITEM T18

Refer to Check Item E3, page 14 or Check Item S1, page 18.

What is the ID number of this employer or business?

PGM 7

8214

☐ Employer number

OR

8218

☐ Business number

3. When did ... start working for (Read name of employer or business)?

8218

Month

x1 ☐ Don't know

8220

1 9 Year

x1 ☐ Don't know

} SKIP to 5

4a. When did ... last work at a paid job or business (lasting 2 consecutive weeks or more)?

8222

Month

x1 ☐ Don't know

8224

1 9 Year

x1 ☐ Don't know

} SKIP to Check Item T19

8228

x3 ☐ Never worked for 2 consecutive weeks or more

} ASK 4b

b. What is the main reason ... never worked 2 consecutive weeks or more at a job or business?

8228

1 ☐ Taking care of home or family

2 ☐ Ill or disabled

3 ☐ Going to school

4 ☐ Couldn't find work

5 ☐ Didn't want to work

7 ☐ Other

x1 ☐ DK

} SKIP to Check Item T21, page 52

5. Before this job when did ... last work at a paid job or business lasting 2 consecutive weeks or more?

8230

Month

x1 ☐ Don't know

8232

1 9 Year

x1 ☐ Don't know

8234

x3 ☐ Never had another job lasting two weeks or more -- SKIP to 8a, page 51

CHECK ITEM T19

Is the year in item 4-a or item 5 between 1975 and 1986?

8236

1 ☐ Yes

2 ☐ No -- SKIP to 8a, page 51

5 ☐ Natural father only parent present
6 ☐ Other

b. When ... was 16, who was ... living with that was the head of the family?

8564

- 1 ☐ Father
2 ☐ Grandfather
3 ☐ Some other male
4 ☐ Mother
5 ☐ Grandmother } SKIP to 5a
6 ☐ Some other female ...
7 ☐ Not applicable – SKIP to Check Item T32

3a. When ... was 16, what was ...'s (father's/stepfather's or person marked in item 2b) occupation?

8566

x1 ☐ Did not have a paying job or business – SKIP to 4

PGM 8

Write in occupation

8568

b. What kind of business or industry was he working for?

PGM 8

8570

For example: TV and radio manufacturing, retail shoe store, State Labor Department, farm.

4. What is the highest grade of school ...'s (father/stepfather or the person marked in item 2b) ever completed?

PGM 7

8572

- 1 ☐ Never attended
2 ☐ Elementary 1–8
3 ☐ High school 1–3
4 ☐ High school graduate
5 ☐ College 1–3
6 ☐ College 4
7 ☐ College 5 or more
x1 ☐ DK

CHECK ITEM T31

Refer to item 2a.
Is box 1, 2, or 3 marked in item 2a?

8574

- 1 ☐ Yes
2 ☐ No – SKIP to Check Item T32

5a. When ... was 16, what was ...'s (mother's/stepmother's or person marked in item 2b) occupation?

8576

x1 ☐ Did not have a paying job or business – SKIP to 6

PGM 8

Write in occupation

8578

b. What kind of business or industry was she working for?

PGM 8

8580

For example: TV and radio manufacturing, retail shoe store, State Labor Department, farm.

6. What is the highest grade of school ...'s (mother/stepmother or the person marked in item 2b) ever completed?

PGM 7

8582

- 1 ☐ Never attended
2 ☐ Elementary 1–8
3 ☐ High school 1–3
4 ☐ High school graduate
5 ☐ College 1–3
6 ☐ College 4
7 ☐ College 5 or more
x1 ☐ DK

Section 5 — TOPICAL MODULES (Continued)

Part F — MARITAL HISTORY

CHECK ITEM T32

Refer to cc item 26a.

8600

What is ...'s current marital status?

- ☐ 1 Married, spouse present
- ☐ 2 Married, spouse absent
- ☐ 3 Widowed
- ☐ 4 Divorced
- ☐ 5 Separated
- ☐ 6 Never married — SKIP to Statement F, page 59

STATEMENT E.

Now I have a few questions about ...'s marital history.

1. How many times has ... been married?

8602

- ☐ 1 — SKIP to Check Item T36
- ☐ 2
- ☐ 3
- ☐ 4 +

2a. In what month and year did ... get married for the first time?

8604

Month x1 ☐ Don't know

8606

1 9 Year x1 ☐ Don't know

b. Did ...'s first marriage end in widowhood or in divorce?

8608

- ☐ 1 Widowhood
- ☐ 2 Divorce

c. In what month and year was ... (widowed/divorced)?

8610

Month x1 ☐ Don't know

8612

1 9 Year x1 ☐ Don't know

CHECK ITEM T33

Is "Widowhood" marked in item 2b?

8614

- ☐ 1 Yes — SKIP to Check Item T34
- ☐ 2 No

2d. In what month and year did ... actually stop living with ...'s spouse?

8616

Month x1 ☐ Don't know

8618

1 9 Year x1 ☐ Don't know

CHECK ITEM T34

Refer to item 1.

How many times has ... been married?

8620

- ☐ 1 2 — SKIP to Check Item T36
- ☐ 2 3 +

3a. In what month and year did ... get married for the second time?

8622

Month x1 ☐ Don't know

8624

1 9 Year x1 ☐ Don't know

b. Did ...'s second marriage end in widowhood or in divorce?

8626

- ☐ 1 Widowhood
- ☐ 2 Divorce

c. In what month and year was ... (widowed/divorced)?

8628

Month x1 ☐ Don't know

8630

1 9 Year x1 ☐ Don't know

CHECK ITEM T35

Is "Widowhood" marked in item 3b?

8632

- ☐ 1 Yes — SKIP to Check Item T36
- ☐ 2 No

3d. In what month and year did ... actually stop living with ...'s second spouse?

8634

Month x1 ☐ Don't know

8636

1 9 Year x1 ☐ Don't know

	8794	<input type="checkbox"/> 1 9 Year <input type="checkbox"/> Don't know																		

Section 5 — TOPICAL MODULES (Continued)

Part H — FERTILITY HISTORY (Continued)

**CHECK
ITEM T47**

Refer to item 4a.
Was ...'s second child born
on or after January 1, 1960?

8796

- 1 ☐ Yes
2 ☐ No — SKIP to item 5a

ASK OR VERIFY —

4b. With whom does the child live now?

8798

- 1 ☐ Resides in this household — Go to Check item T48

Resides elsewhere

- 2 ☐ In his/her own household

With relatives

- 3 ☐ With own father
4 ☐ With own grandparent(s)
5 ☐ With adoptive parents
6 ☐ With other relatives

With nonrelatives

- 7 ☐ In foster care/foster family
8 ☐ In an institution (hospital)
9 ☐ In school
10 ☐ In correctional facility
11 ☐ Other
12 ☐ Deceased
13 ☐ DK

SKIP to item 5a

**CHECK
ITEM T48**

Write the person number of
the second child.

8800

Person number of second child

5a. When was ...'s (first) child born?

8802

Month x1 ☐ Don't know

8804

1 9 Year x1 ☐ Don't know

**CHECK
ITEM T49**

Refer to item 5a.
Was ...'s (first) child born on or after
January 1, 1960?

8806

- 1 ☐ Yes
2 ☐ No — SKIP to Check Item T51, page 62

ASK OR VERIFY —

5b. With whom does the child live now?

8808

- 1 ☐ Resides in this household — Go to Check item T50

Resides elsewhere

- 2 ☐ In his/her own household

With relatives

- 3 ☐ With own father
4 ☐ With own grandparent(s)
5 ☐ With adoptive parents
6 ☐ With other relatives

With nonrelatives

- 7 ☐ In foster care/foster family
8 ☐ In an institution (hospital)
9 ☐ In school
10 ☐ In correctional facility
11 ☐ Other
12 ☐ Deceased
13 ☐ DK

SKIP to Check Item
T51, page 62

**CHECK
ITEM T50**

Write the person number of
the (first) child.

8810

Person number of first child

NOTES

Section 5 — TOPICAL MODULES (Continued)

Part I — HOUSEHOLD RELATIONSHIPS

**CHECK
ITEM T51**

What is the composition
of this household?

9266

- 1 ☐ One person HH
2 ☐ Two person HH consisting of husband and wife
3 ☐ Two person HH consisting of non-relatives
4 ☐ Other

SKIP to
Check
Item C1,
page 67

**CHECK
ITEM T52**

Is this the Reference Person's
questionnaire?

9268

- 1 ☐ Yes
2 ☐ No — SKIP to Check Item C1, page 67

Pretranscribe each person's name and person number into column headings a — n: list names and person numbers in the SAME ORDER in the roster down the left side of this page.

AT TIME OF INTERVIEW

Verify the Roster against the current household composition in cc items 18 and 19a. If a person who was pretranscribed has left the household since last wave, line out name and person number in Roster space and column. If a person has entered the household since last wave, write in name and person number in the first available (blank) Roster space and column.

STATEMENT H

Now I need to record the EXACT relationships among the persons living here. Please answer by describing adoptive, step, or foster relationships, where appropriate.

For each person number listed on the left side of this page, ask question 1 and enter codes from Flashcard FF

ASK OR VERIFY —

1. What is the EXACT relationship of (person listed in roster) to each person listed in columns a — n?

APPENDIX D

Machine-Readable Data Dictionary Layout

Data dictionary lines are 46 characters. The character on the first position determines the type of lines. Each variable may have the following lines:

1. COMMENTS (" * ") lines
2. DATA DICTIONARY (" D ") ; line and DATA DESCRIPTION
3. UNIVERSE (" U ") lines
4. VALUE DESCRIPTION lines
5. One blank line at the end

FORMAT

"*" LINE ÷ COMMENTS

- a. " * " in the first position indicates that this is a comment line. This line can appear any place in the dictionary. It will be used for short comments or to nullify any value codes.
- b. " ** " in the first two positions is also comments but it has additional meaning. It indicates this is a block of comments which will be applied to several variables. The first line of this block will ave the COMMENT NO. so that subsequent variable can refer back to this comment block.

"D" LINE ÷ DATA DICTIONARY

This line contains the following information:

ID	"D"	COL	1- 1
NAME	Variable name	COL	3-10
SIZE	Size of data field	COL	14-15
BEGIN	Begin position of data field	COL	19-22
TYPE	Character variable indicator "CHAR" or blanks if numeric variable	COL	26-29
DEC	Implied decimal places	COL	33-34
IND	TABLE variable indicator "TABLE" with "(aa)" for its dimension; otherwise blanks	COL	38-46

Text describing the variable will follow this "D" line. Use COL. 6-46 and repeat as many lines as necessary.

"U" LINE ÷ UNIVERSE DEFINITION

This line contains the universe definition. Use COL. 3-46 and repeat as many lines as necessary.

ID	" U "	COL	1- 1
DESCRIPTION	Universe description	COL	3-46

(For continuation use COL. 3-46 and repeat as many lines as necessary.)

"V" LINE ÷ VALUE DEFINITION

ID	" V "	COL	1- 1
VALUE	Value code-right justified	COL	3-12
	" "	COL	14
DESCRIPTION	Value description	COL	15-46

(Repeat COL. 14-46 format for continued value description.)

APPENDIX E

User Notes

This section is reserved for any information relevant to the SIPP 1986 Panel, Wave 2 Rectangular Microdata File that indicates specific problems with the data, or that becomes available after the file is released. Any such information should be filed behind this page.

User Notes will be sent to all users who (1) purchased their file (or technical documentation) from the Census Bureau and (2) returned the coupon following the title page.
